

30' x 30' x 15' Three Car Portable Building

Protect Your Investments from Inclement Weather & Sun Damage

MDM Products 30x30 Buildings provide the best in instant and portable protection for any purpose. Typical uses include contractor workshop areas, equipment/material storage, and temporary work areas. Excellent jobsite protection of equipment, and rain protection to increase productivity. The round style unit provides extra space along the sides of the enclosure, with maximum height near the center ridge. The pre-drilled frame is easily assembled with minimal handtools. No drilling or field cutting is required. All frame components are made from heavy galvanized materials. Main cover and doors are made from long life UV Resistant, Fire Retardant Polyethylene with woven backing. All fabric components feature heat-welded seam

construction. Unit features triple zipper doors on BOTH ENDS to allow access from either end, drive-through capability, and good ventilation. Each door contains a pocket for a rigid pole and grommets for securing them up during use. The long lasting cover design provides for run-off of rain or melting snow to avoid water getting in through the perimeter of the cover. Each unit comes equipped with a set of 14 duckbill earth anchors, with a 36" stainless steel tether, and drive rod, to secure the unit at all strategic points.
