## PRIOR TO INSTALLATION

- 1- For best results, we recommends that this unit be installed by a licensed, professional plumber.
- 2- Please read over these instructions thoroughly before beginning installation. Make sure that you have all tools and supplies needed to complete the installation.
- 3- Please flush the water system to ensure that no metal swarf, solder, and other impurities can enter the faucet that might damage the cartirdge. (Most of the leakages and water flow issues are from avoinding this very necessary step).
- 4- Turn off the hot and cold water lines at the angle valve and turn on the old faucet to release any built-up pressure.
- 5- Keep this booklet and the receipt (or other proof of date and place of purchase) for this product in a safe place. The receipt is required should it be necessary to request warranty parts.
- 6- Please keep the box and packaging materials until your product is completely installed and functional.

## Cleaning and Care

Clean the faucet often with a soft cloth to keep it looking like new. For heavy cleaning you can use mild liquid detergents or non-abrasive liquid polisher. Rinse with water and dry with a soft cloth. Avoid abrasive cleaners, steel wool and harsh chemicals as these will dull the finish and void your warranty.

## Tub Spout Instructions

SHUT OFF WATER SUPPLIES.

Consider the type and the thickness of your finished wall before placing your stringer back plate.

Install the threaded adapter (**Not supplied**) so the surface of the finished wall is flush with the front of the threaded adapter.

Make sure that 1/2" threaded adapter is installed securely inside the wall.

Screw tub spout into the threaded adapter.
