

# DF - 6

## INDUSTRIAL CEILING FAN

The DF-6 is a powerful ceiling-mounted industrial fan designed for wide coverage in warehouses, shops, and large facilities. Available in 10 ft and 14 ft sizes, it features a quiet direct-drive motor and a rugged frame that delivers nonstop airflow without the hassle of gear-driven systems.

Built for efficiency and long-term use, the DF-6 keeps your environment cooler while keeping maintenance off your plate

## KEY FEATURES

- **More airflow, less bulk** — the DF-6 pushes serious air from above without the weight, noise, or wobble of oversized gear-driven fans
- **Dependable by design** — heavy-duty fan made to run hard for years without the maintenance headaches competitors bring
- **Zero gears, zero problems** — unlike traditional ceiling fans that constantly break down, our direct-drive motor runs smooth for years with no maintenance
- **750W of clean, direct-drive power** — built with a high-efficiency 1HP motor that outperforms bulky gear-driven fans while running quieter, cooler, and stronger
- **High-performance blades** — machined aluminum airfoils deliver stronger, cleaner airflow than stamped or plastic competitor blades ever could
- **Proudly USA Made** — with quality parts and real industrial standards — not the cut corners and import shortcuts you'll find elsewhere

### DIAMETER

**10' or 14'**  
**ALUMINUM AIRFOILS**

### COVERAGE AREA

**11,000 SQ. FT.**

### TELESCOPING

**2FT TO 4FT**  
**HEIGHT ADJUSTMENT**

### ENVIRONMENTAL

**40°F - 120°F**  
**MOTOR IP55**

**INDUSTRIAL**  
**FAN CO**

**See why facilities across the U.S.  
are switching to IFC floor fans**
