

Software Update

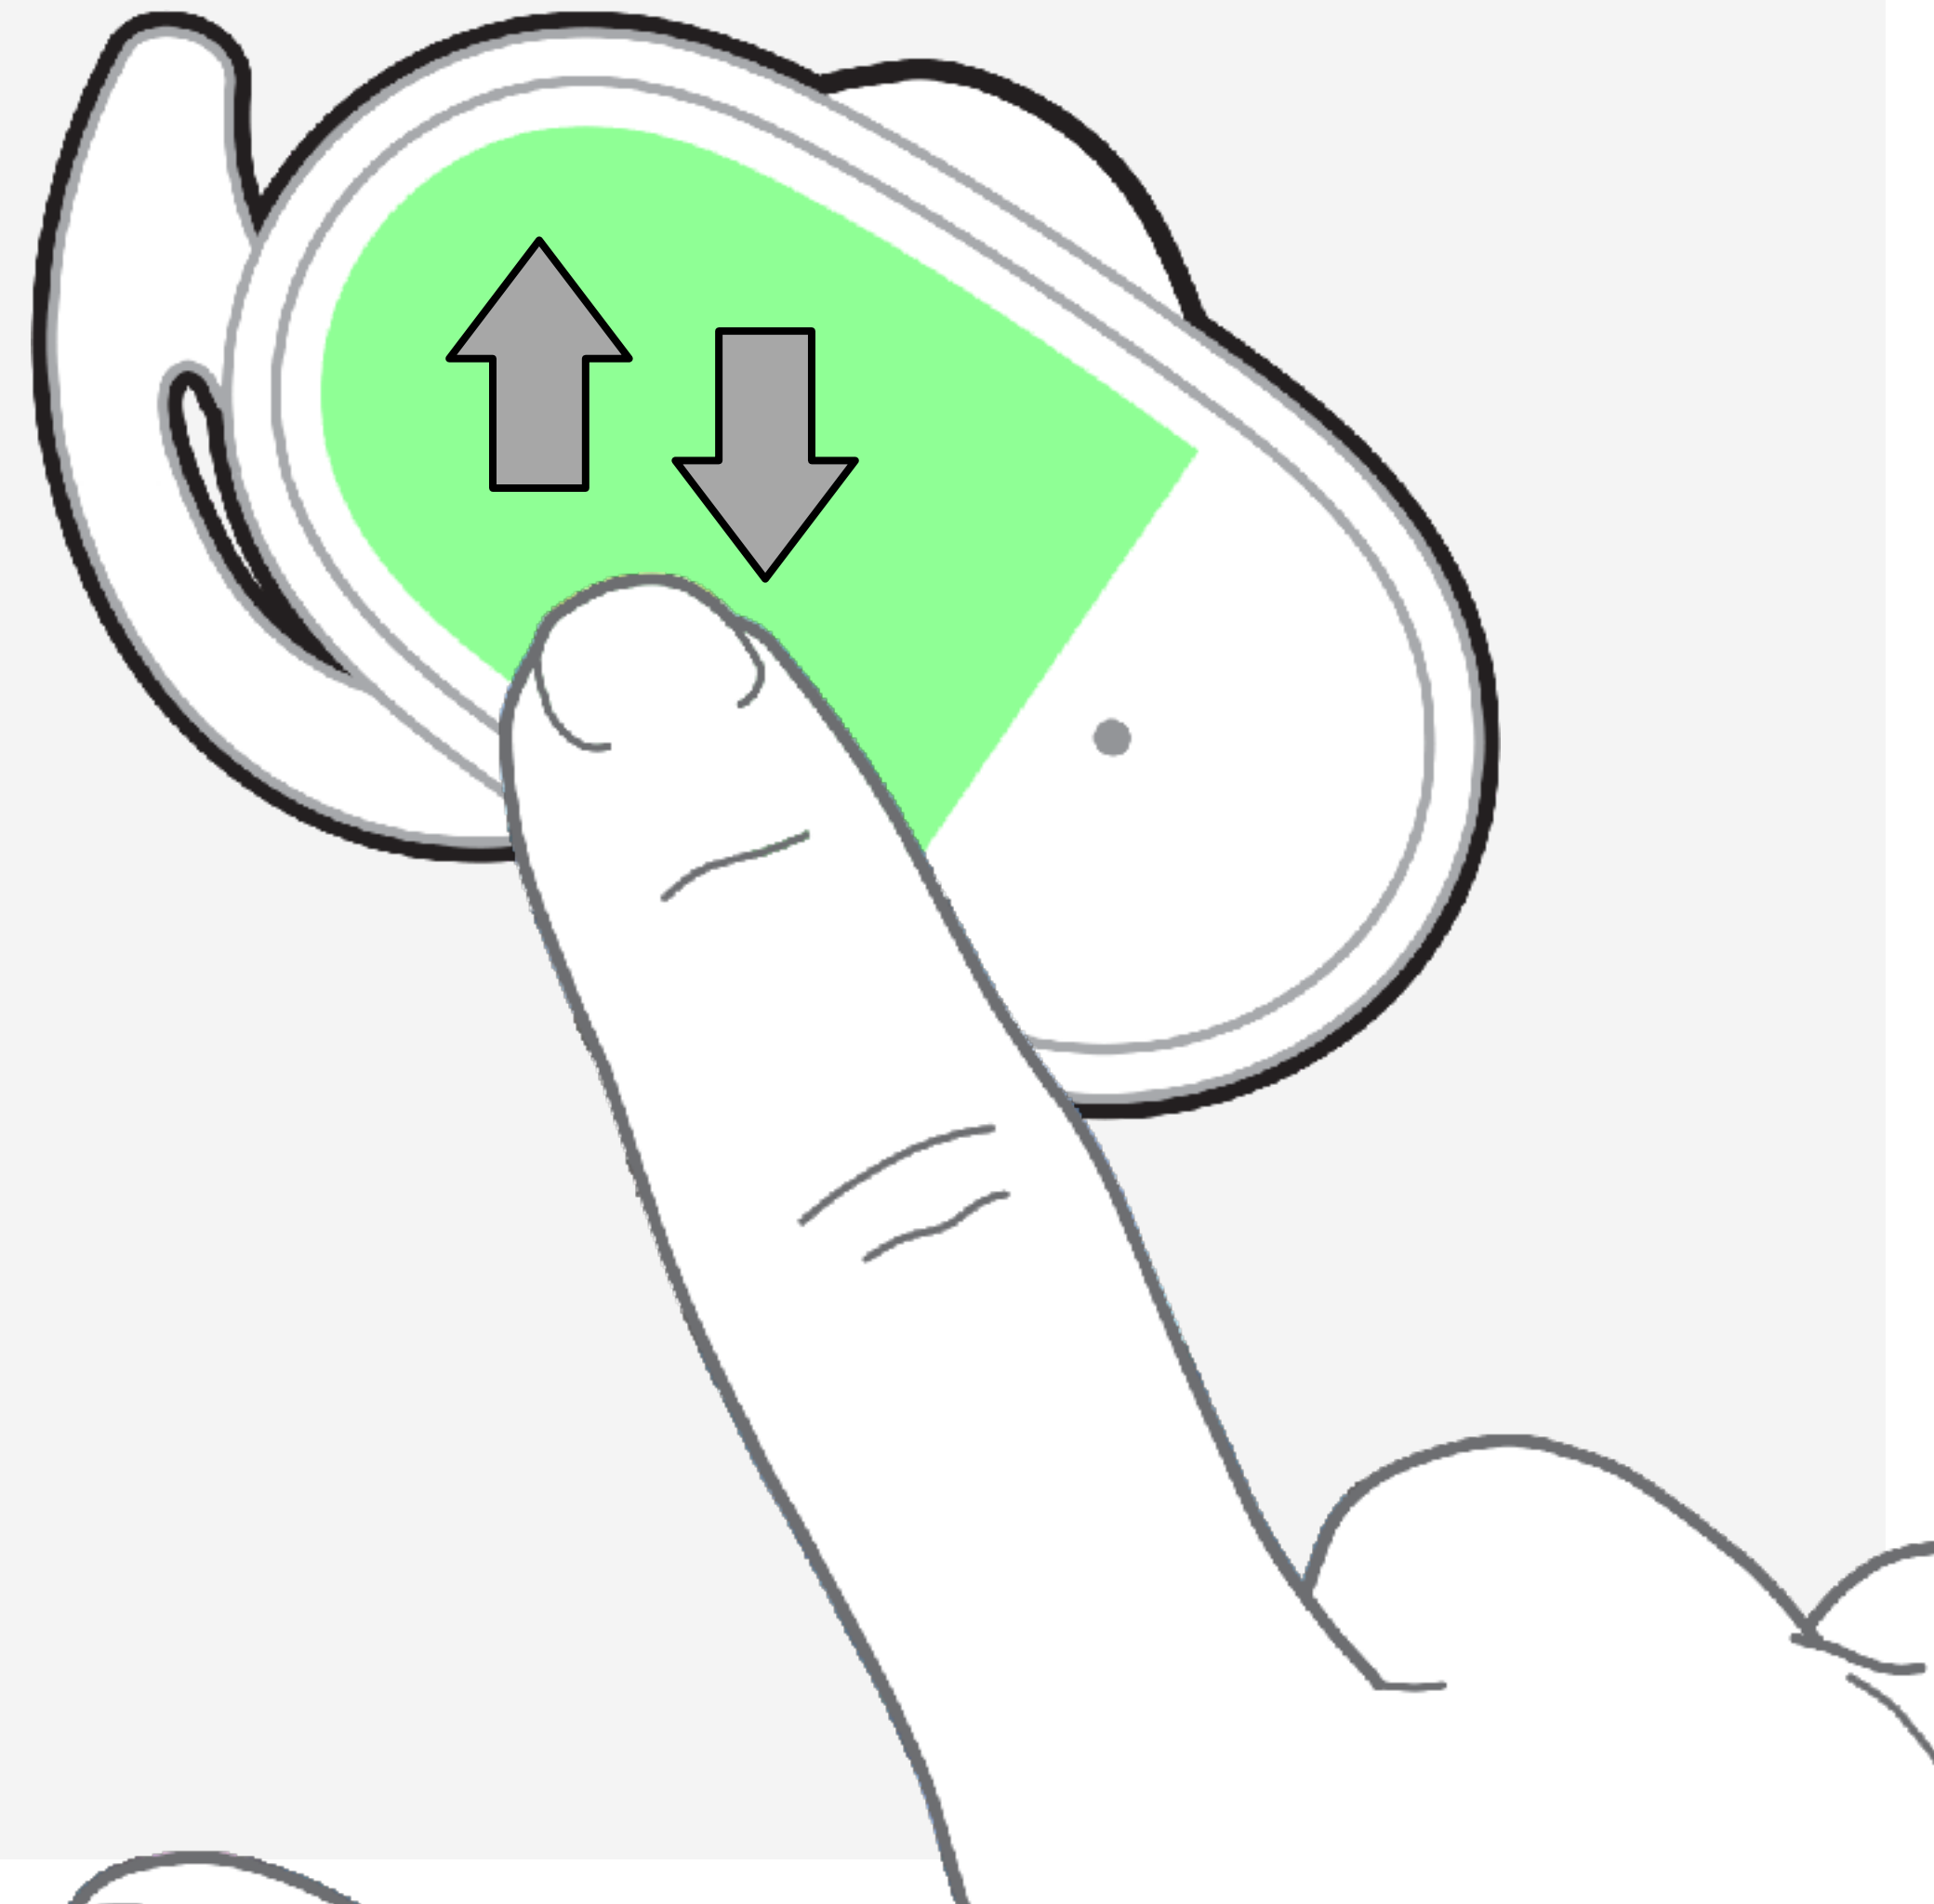

TOUCH VOLUME CONTROL

DECEMBER 2020

A new version of the Bose Music app is now available (version 4.2.4) and has begun rolling out to Bose Music Users.

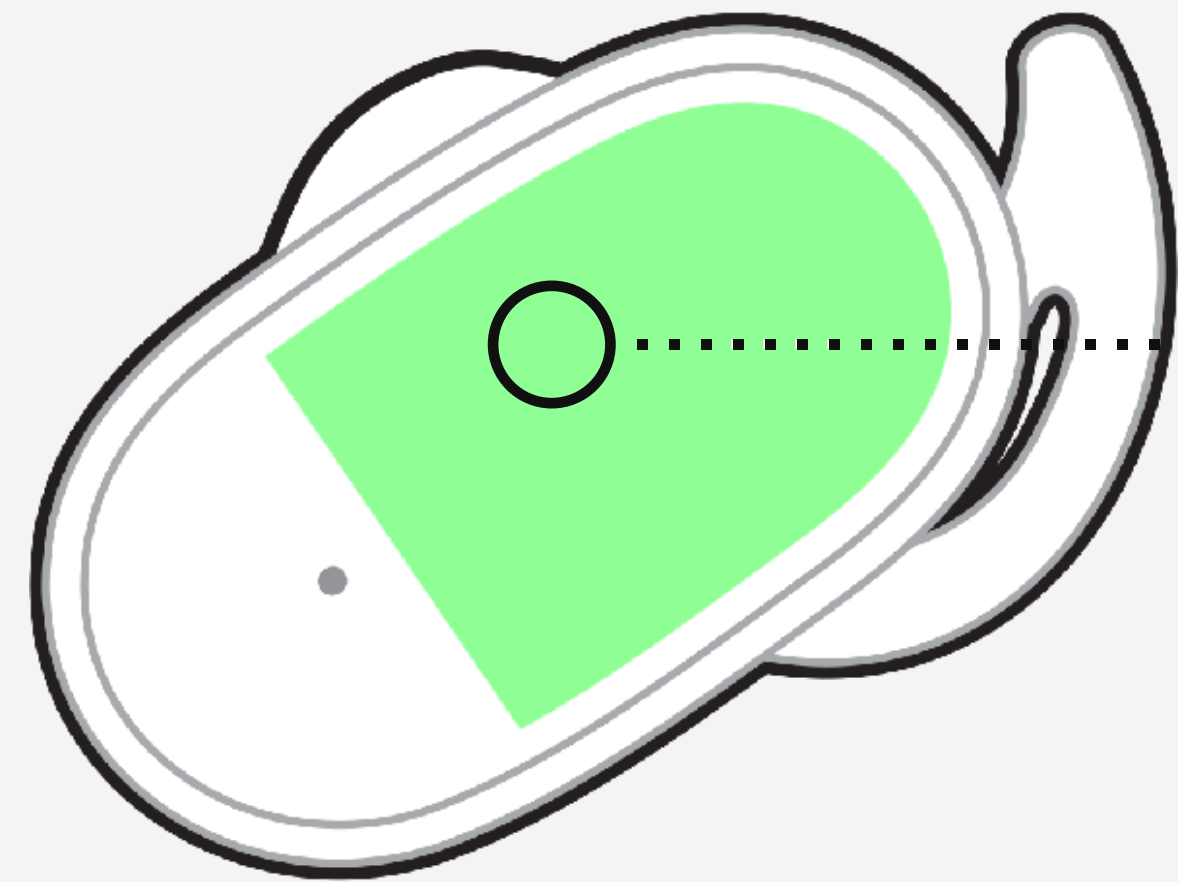

This update introduces Volume Control for the Bose QuietComfort Earbuds and Sport Earbuds.

The controls work with the same intuitive touch touch features we launched in Headphones 700. Simply swipe up to raise volume and down to lower volume.

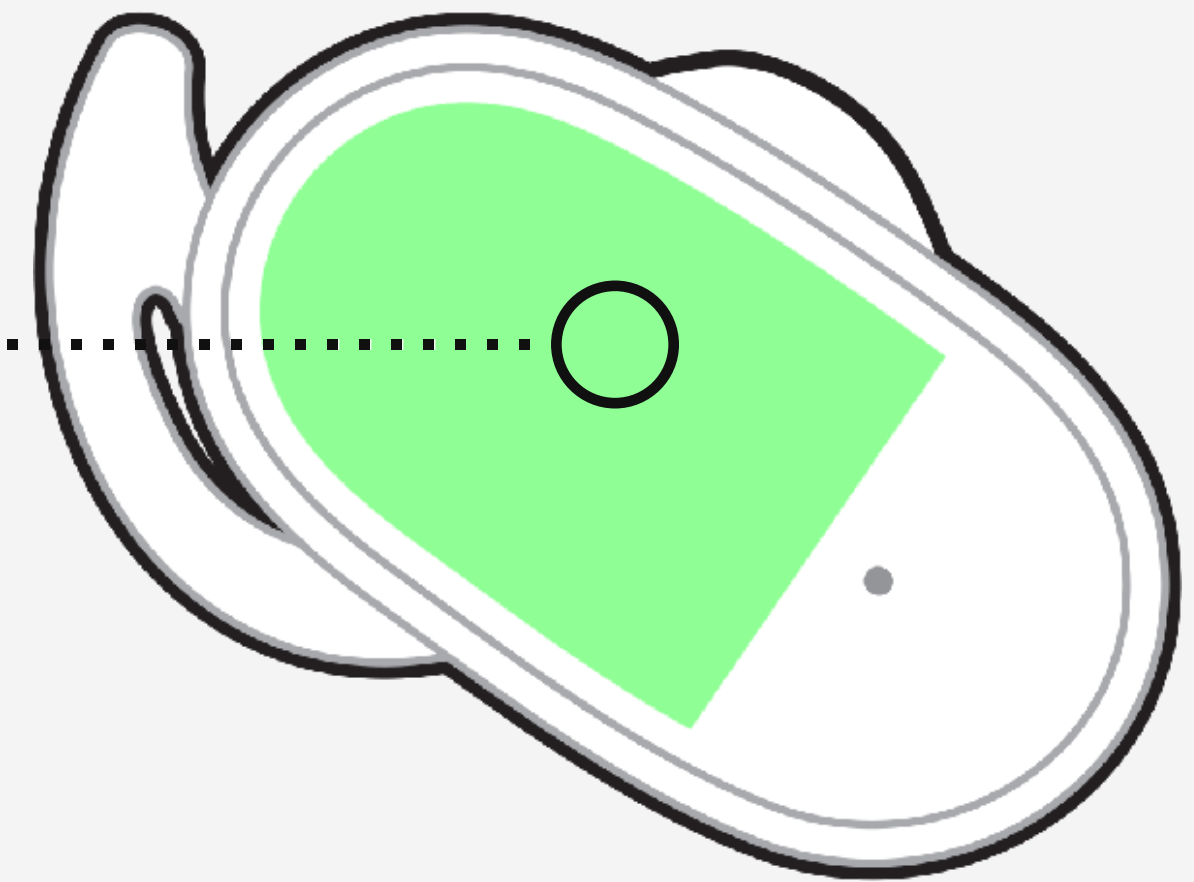

BOSE QUIETCOMFORT EARBUDS

Touch Control Overview

Touch Surface

Noise cancelling (2x)

Shortcut (Hold)

(Announce Battery Level OR Skip Track Forward)

Play/pause (2x)

Answer/End (2x)

Voice control (Hold)

Swipe Up/Down Volume

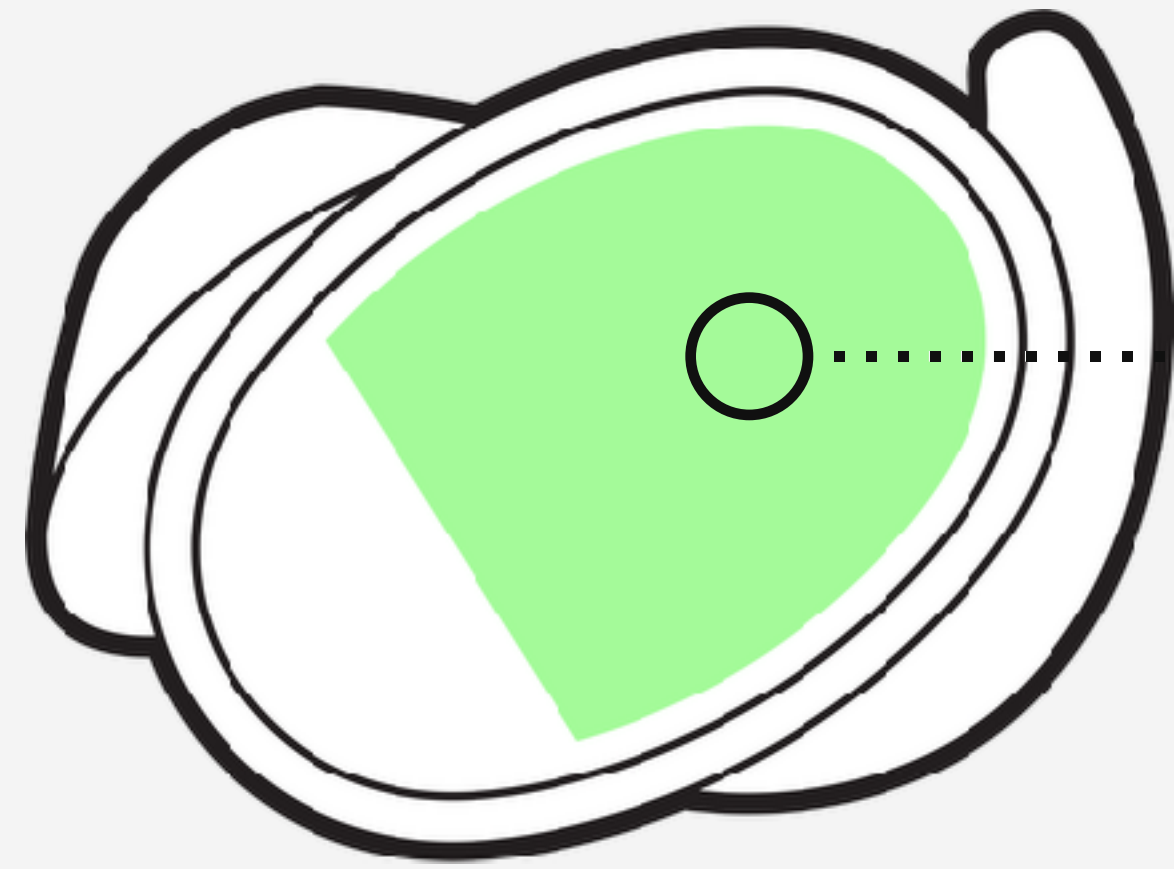

Left

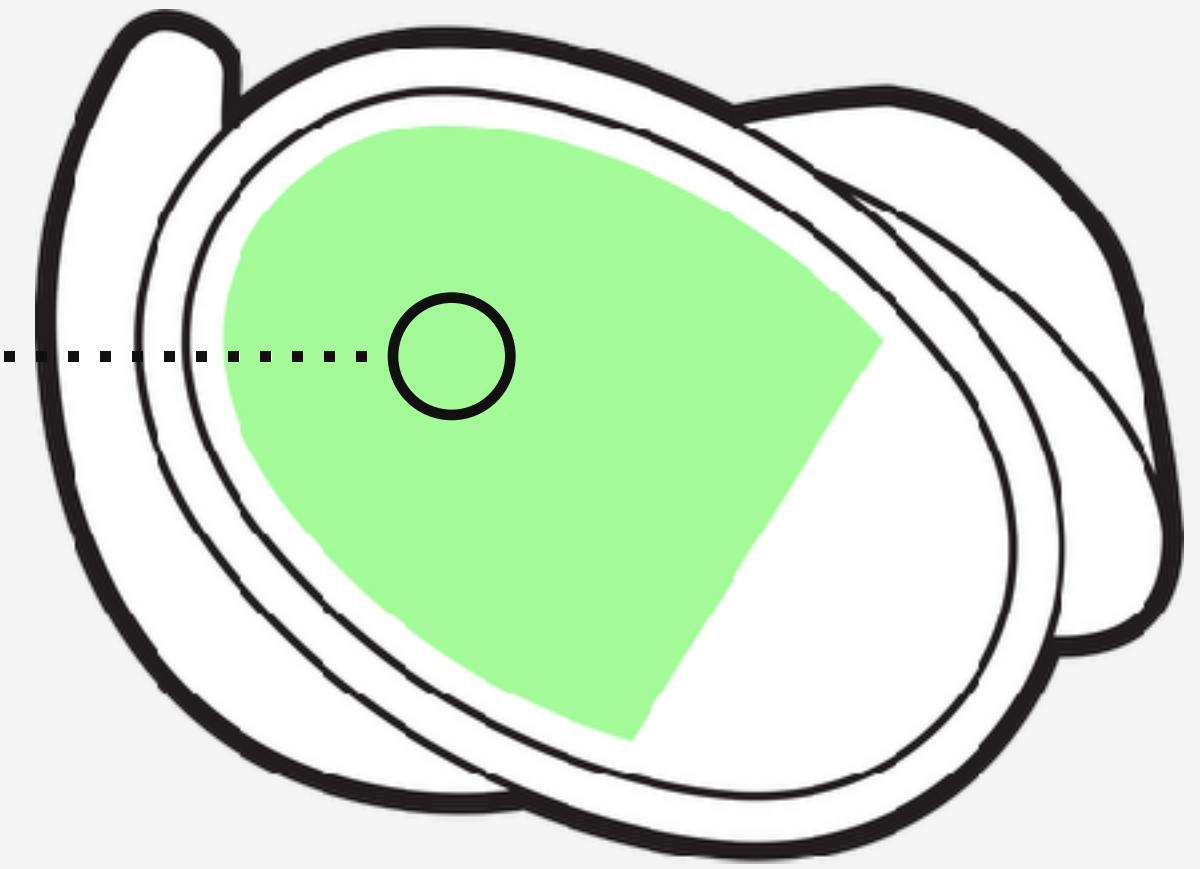

Right

BOSE SPORT EARBUDS

Touch Control Overview

Touch Surface

Shortcut (Hold)
(Announce Battery Level OR Skip Track Forward)

Play/pause (2x)

Answer/End(2x)

Voice control (Hold)

Swipe Up/Down Volume

Left

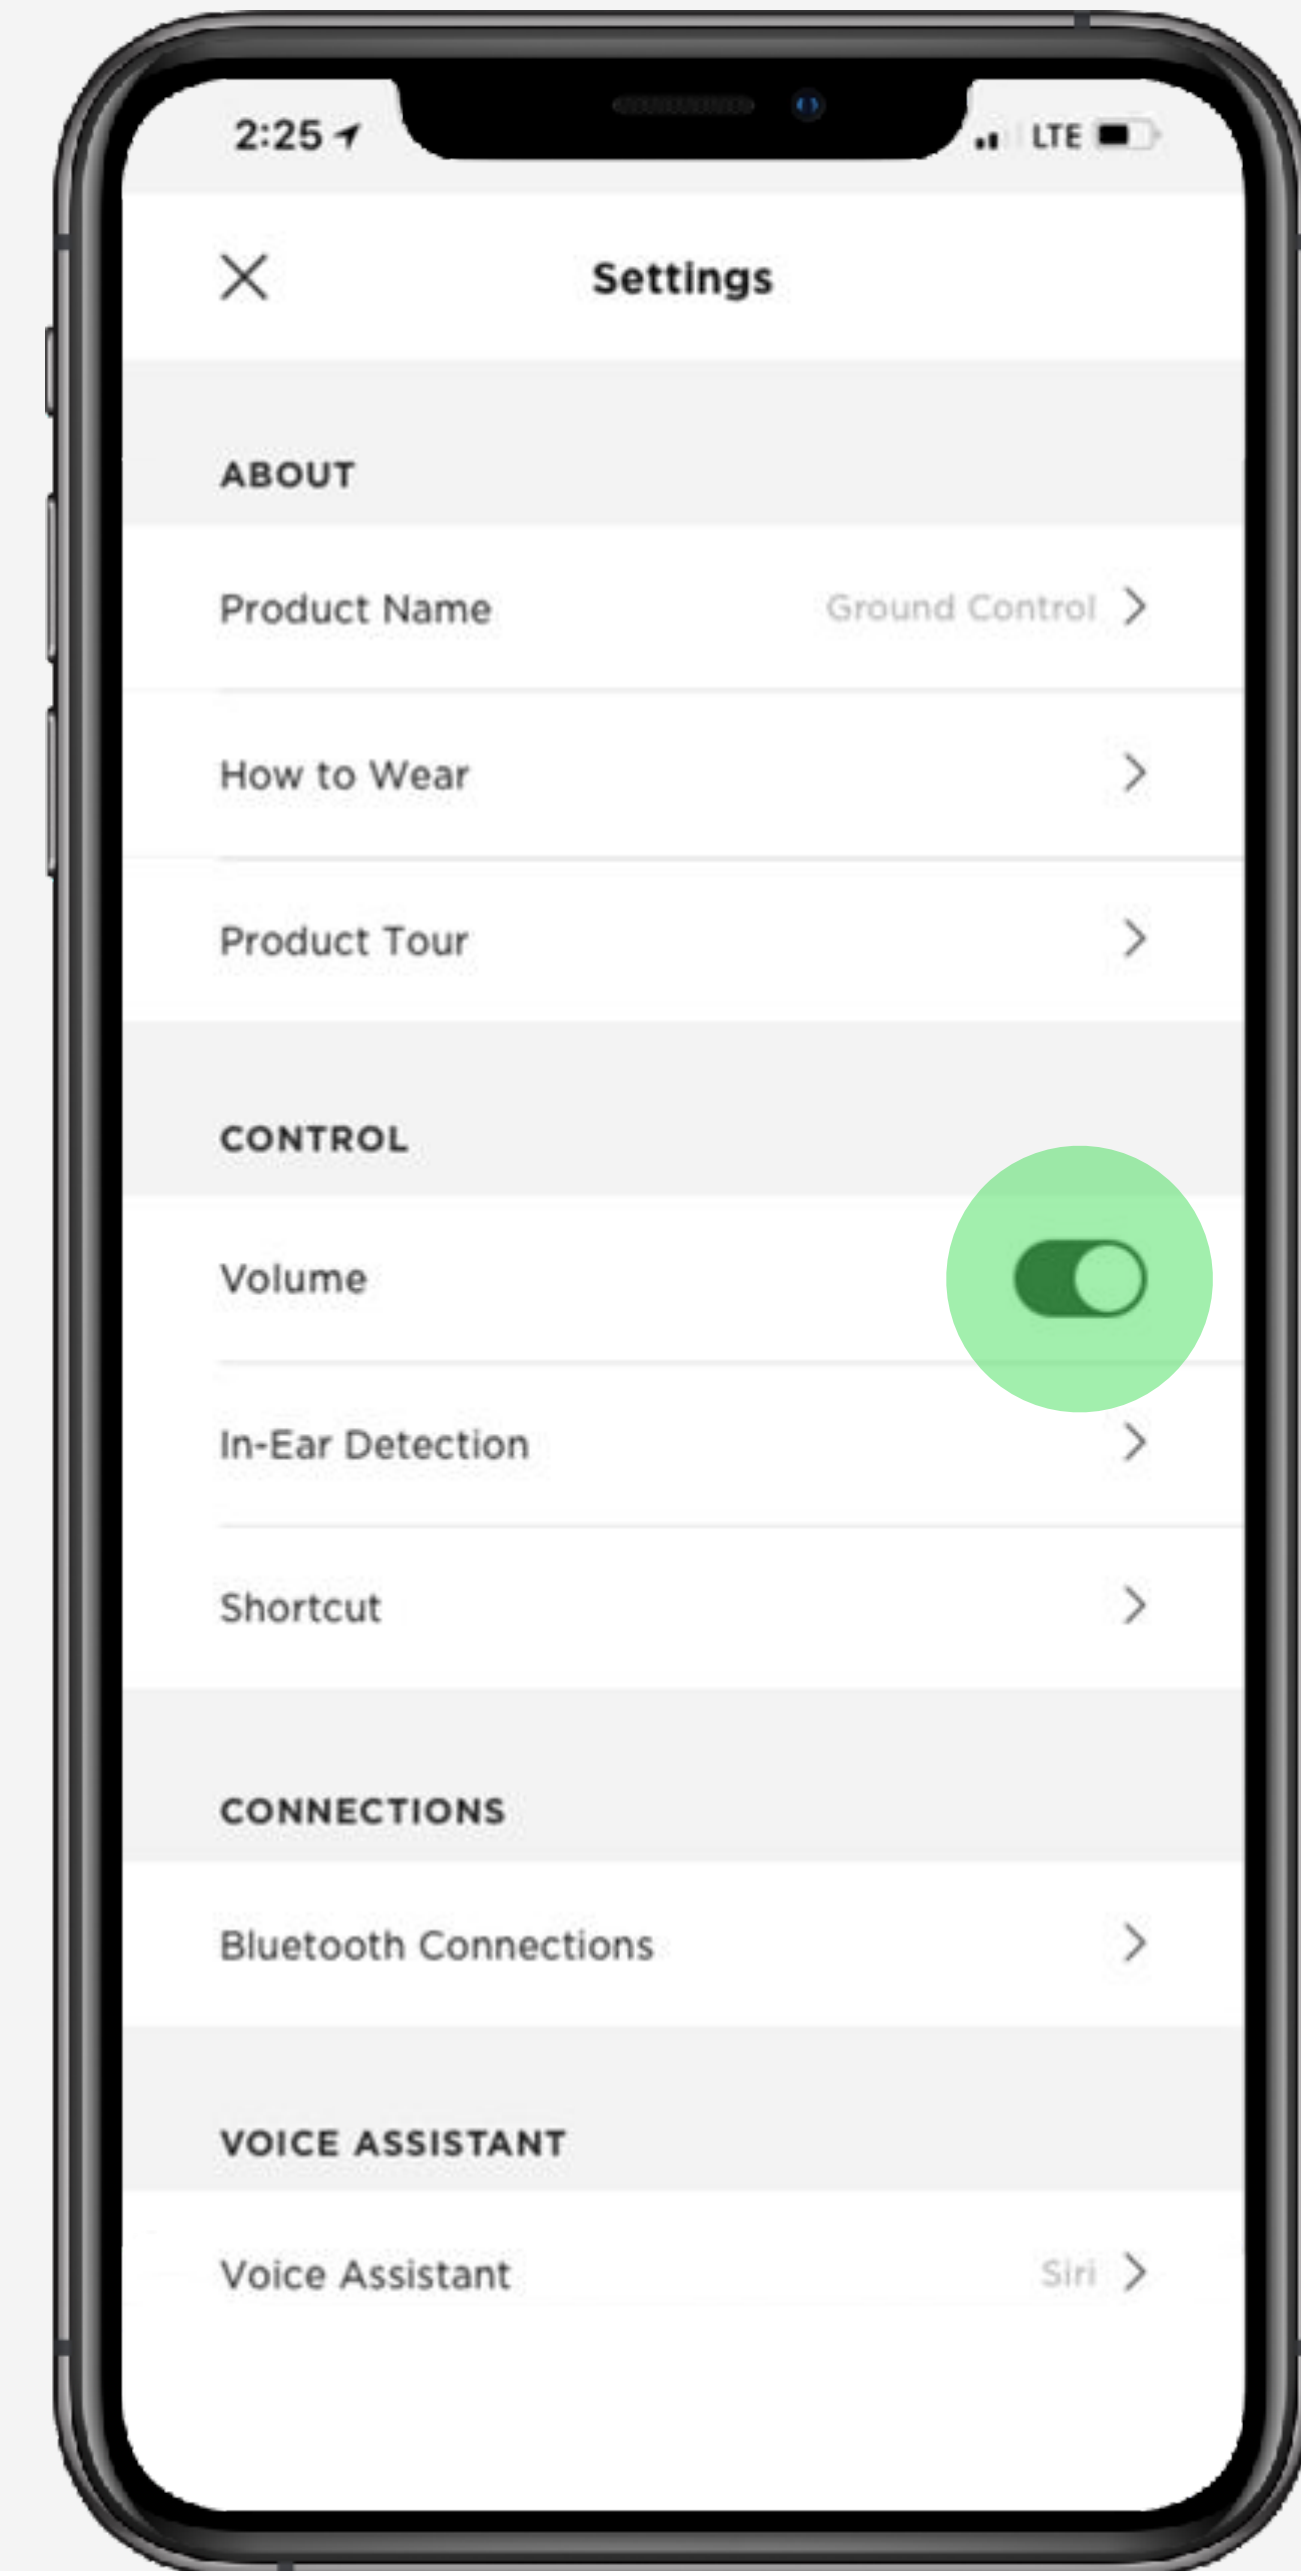

Right

Bose Music App

Volume Opt-In

Volume control will be released as an opt-in feature which can be turned on with the toggle switch under settings shown here.
