

VicStrip Spacer Kit

PUBLIC SPACES / WORKSPACES / HI-FI & HOME CINEMA

Description

VicStrip Spacer Kit is an improved version of the innovative slat acoustic panel enhanced with a frame structure that allows the addition of a second layer of PET and an air gap to reach better acoustic performance, engineered for more demanding rooms, such as home cinemas and hi-fi listening spaces.

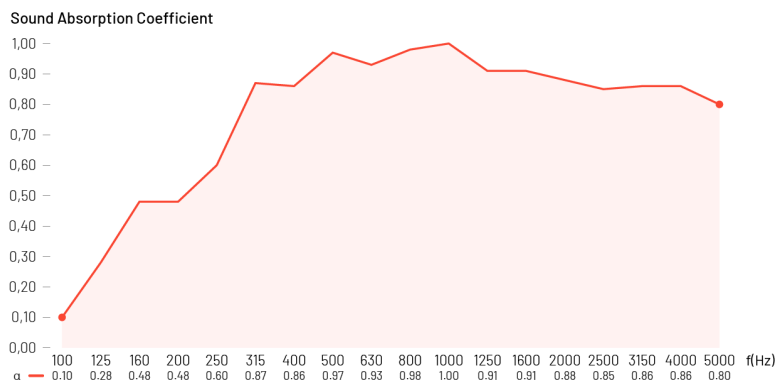

Main features

- A black frame around the entire structure of the Spacer gives VicStrip a new decorative look
- An air gap of 40mm between the panels and the wall is achieved behind the wood structure, which was conceived to optimize the acoustic response of the panel
- A layer of VicPET Wool with 8mm is assembled behind the VicStrip panels which reach 12mm, making the panels a double-layer with around 20mm of PET to enhance sound absorption

The VicStrip Spacer Kit includes:

- 4 un. of VicStrip 1190x595x12mm
- 4 un. of VicPet Wool 1190x595x8mm
- 1 VicSpacer XXL (Black Frame)

Performance

NRC: 0.85

V02-Jun.23

Available Finishes*

* Different batches may show a color variation
