ABOUT US

Oil Sponge LLC has 30 years of manufacturing and sales experience in providing cost effective environmental solutions for responding to spills and cleaning situations caused by hydrocarbon-based spills. Our products have been tested and approved for use by the Army Corp. of Engineers, the National Aeronautics and Space Administration, Los Alamos National Laboratories, the Rochester Institute of Technology.

Oil Sponge LLC manufactures a complete line of bio-remedial absorbents and cleaners that clean-treat and dispose of organic hydrocarbons through a process known as bio-remediation. We also carry a complete line of BRADY SPC polypropylene absorbent socks, pads, rolls and spill kits to absorb spills on land and water.

CORE COMPETENCIES

- ✓ Development, and manufacturing of bioremedial and environmentally compatible absorbents and cleaners
- ✓ Bio-Remedial parts washer solution and supplies for use in maintenance, repair, and operations facilities
- ✓ Oil spill recovery products including loose absorbents, pads, socks, booms, and spill kits
- ✓ ReladYne Supplier, the nation's leading automotive, industrial, and commercial lubricants provider
- ✓ Maintenance supplies including air filters, oil filters, fuel filters, and wiper blades
