

NATURAL ACTION

“Water, the Way Nature Intended.”

Thank you for choosing our water enhancing technology for your home

Garden Revitalizer

Our Garden Revitalizer creates water the way nature intended, water that is alive and has the same benefits as rainwater. Experience improved growth and a thriving garden with the power of structured, revitalized water.

To begin installation, ensure your spigot or hose end is clean and free of debris. Attach the Garden Unit securely by screwing it onto the spigot or connecting it to the hose end, making sure there are no leaks. For maintenance, regularly check for wear and tear. During colder months, detach the unit and store in a dry, frost free location to prevent damage from freezing temperatures.

By following these steps, you can ensure your garden unit operates efficiently and has a long service life.

Specifications

- **Materials:** Food grade 304 Stainless Steel and Polymer Activated Flow Form, proprietary Di-Electric media
- **Fittings:** Garden end connectors
- **Total Install Length:** Approximately 5'
- **Weight:** 1lb
- Misuse or improper installation may void your warranty or cause subsequent water damage at your own liability.
- Also works great on your RV hose when traveling.
