From Harvest to Hearth

LogOX is dedicated to providing our customers with the finest American-made tools and machinery in the forestry and firewood heating industries. All of our products are engineered to help you be more productive while making your work faster, safer, and easier.

LogOX continues to develop and patent our own innovative products while partnering with other companies that share our values and commitment to quality. Together we offer a selection of the most innovative, useful, and durable American-made equipment on the market, helping our customers from harvest to hearth.

LogOX ForestrySeries™

LogOX Hauler™ Patented

With its sharp hook, beveled log engagement base, and cantilevered design, you can grip, lift, and move log rounds with minimal bending and strain. Ergonomics and the prevention of injuries are integral to this truly innovative design.

LogOX HaulerHolster™

The LogOX Hauler Holster works in tandem with the LogOX Hauler, allowing you to quickly switch back and forth between using the Hauler to lift log rounds onto a log splitter and operating the controls.

LogOX PickOX™ Pickaroon

Insert this attachment into the Cant Handle extension of your LogOX 3-in-1 Forestry MultiTool and secure it with a clevis pin to easily create one of the most useful tools in any woodlot, a 27" Pickaroon.

LogOX ForestryMultitool™ Patented

The Forestry MultiTool combines three essential forestry tools, the ergonomic advantage of a LogOX Hauler, 40" Cant Hook, and Timberjack, into one. It is the most modular, portable, and versatile hand tool available for anyone who harvests firewood, does tree work, or operates a sawmill.

LogOX CarryOX™ Gearbag

This rugged canvas equipment gear bag allows you to securely store, organize, and transport the 3-in-1 Forestry MultiTool, LogOX accessories, PPE and other necessary gear to and from the work site with ease.

LogOX ForesterPackage™

This package includes the LogOX 3-in-1 Forestry MultiTool, Hauler Holster, PickOX Pickaroon, and CarryOX Gear Bag.

LogOX WoodOX Sling™ Patented

The WoodOX Sling Firewood Carrier is an ergonomic solution for anyone carrying firewood. Its cross body strap evenly distributes weight, so you can carry more firewood with better balance and less strain than using a typical carrying bag or moving it by hand.

LogOX HearthBin™ Patented

The LogOX Hearth Bin Firewood Rack is the most versatile, space-saving, and attractive way to stage your firewood before burning—with an adjustable side design that allows it to fit in virtually any space. The lower compartment was designed to conveniently store the WoodOX Sling or kindling.

The LogOX Hauler was scientifically proven to reduce back, bicep, and quadricep strain by up to 93%, 89%, and 76% respectively, while reducing the time it took to engage and move log rounds by 23%.
