There are many fluids that are known to be effective when used with Swab-its® products. There are some fluids that are not compatible with our swabs and may have a negative effect on Swab-its products. Use this list as a reference for what fluids to use. If you have any comments or questions please contact us.

Swab-its would be delighted to hear from you regarding other fluid products you have used that either work or don't work with our swabs.
