

GET TO KNOW YOUR HARNESS AREAS

ADJUSTING YOUR HARNESS

Each part of your harness is customizable—whether you have a single or double option, you can add or remove the wallet based on your personal preferences & comfort.

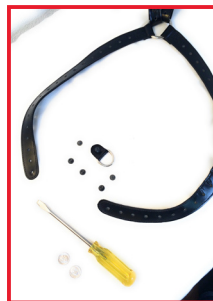

Video instructions: <http://goo.gl/VkpPJ5>

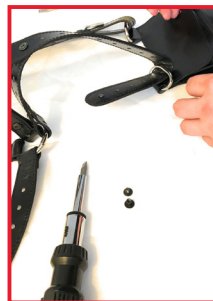

1
Chose which area you'd like to adjust or customize. The hardware in each area adjusts in the same way.

2
Using any screwdriver, or even 1 or 2 coins, loosen the screws until completely removed.

3
Repeat step two until all of the screws are removed from the area you'd like to adjust.

4
Adjust the strap to fit your body size comfortably and align the screw holes accordingly.

5
Reinsert the screws into the newly aligned holes.

6
Using the screwdriver or coin(s), tighten the screws back into place.

TIP: Please note that these chicago screws have screw heads on both ends for maximum security. Be sure to tighten both heads at the same time.
