

Recommendation for Phoenix Hipwear™

Pegasus Senior Living is committed to keeping our residents safe. We have a comprehensive Falls Management Program and do all we can to help residents safely stay active and engaged in all activities. While our focus is on falls prevention, we also understand that not every fall can be prevented. We recognize that in the elderly falls occur and are a common form of injury even in the safe climate of our community.

The consequences of a hip fracture as a result of a fall can be devastating and as a best practice of our organization, we highly recommend the implementation of Phoenix Hipwear, specialized hip protectors for all residents assessed to be at risk for falls and fractures.

Why Phoenix Hipwear

Hip protectors that are bulky or hard can be uncomfortable and unsightly. It can be difficult to encourage someone to wear them, even if they would benefit from the protection they offer.

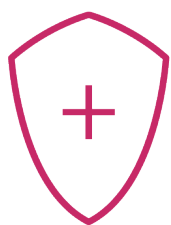

Phoenix Hipwear is different! Very comfortable and well-fitting garments are designed to worn all day and at night. With seven sizes in specialized styles for Women and Men, the underwear will fit perfectly and will accommodate incontinence products, if needed. The underwear has discreet pockets on the side for Phoenix Shields to be inserted.

Phoenix Hipwear shields are powered by an innovative 3D Printed technology with layers of high performing lattice structures. This high impact protection system absorbs and disperses energy by momentarily stiffening on impact. After the fall, the shield is ready for the next impact. To see this in action visit [Phoenix Shield for Advanced Hip Protection](#)

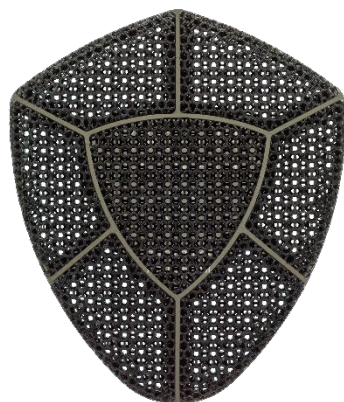

Phoenix Hipwear offers a Starter Pack which includes 3 pairs of underwear and 1 set of shields and this is offered at a special price of \$276.

Phoenix Hipwear underwear with hip protector shields are designed to protect the hips from injuries in a fall. While they may help lessen the severity of the impact in a fall, it does not guarantee that they will prevent a hip fracture.
