

# Earth Day

EXPLORATION GUIDE

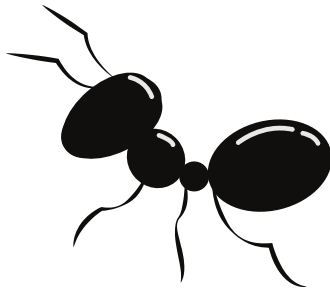

# Scavenger Hunt

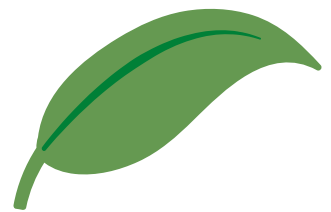

Step outside and see how many natural elements you can spot in the world around you!

Rocks + Minerals

Insects

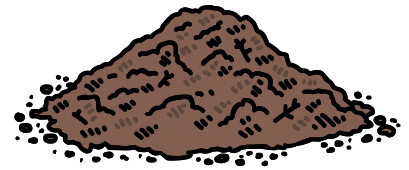

Green Leaves

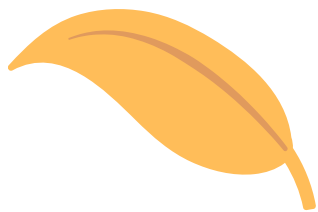

Trees

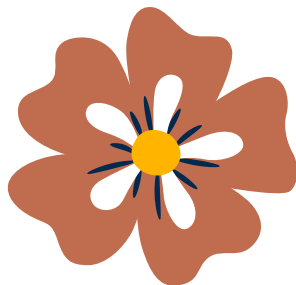

Water

Soil

Yellow Leaves

Flowers

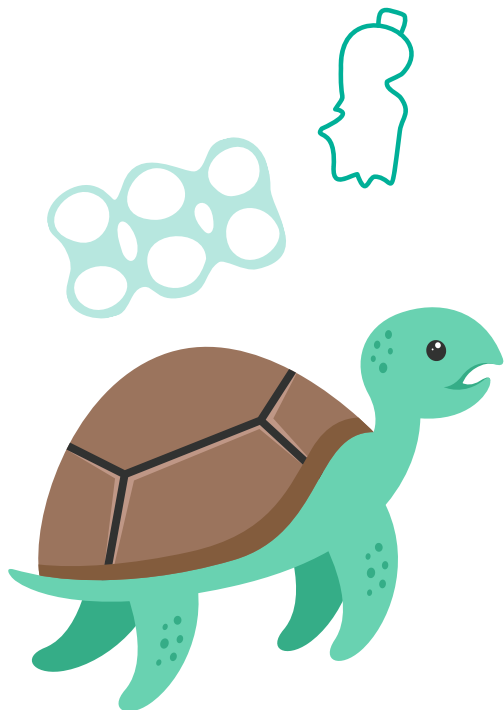

Earthworms

# Recycle

## COMMUNITY CLEAN-UP

Whether it's in your own neighborhood, local river, forest, or park, helping pick-up litter can make a big difference in our ecosystems.

### Did you know?

60% of water pollution is attributed to litter. Researchers estimate that over one million animals are injured each year after ingesting, or becoming entrapped in, improperly discarded trash.

# Grow

## PLANT MORE GREEN

Plants are beneficial to the environment in numerous ways. They help produce oxygen and filter out pollutants to clean the air.

Look up what plants are indigenous to your area and how they can help with pollination in your ecosystem.

# SHARE YOUR EARTH DAY ADVENTURES

We'd love to see what ways you care for the world around you. Tag us on Instagram!
