ABOUT ARMADILLO MERINO®

Defence Photography

Our only goal is to “save your skin”.

We can help protect you by influencing the choice of clothing that you wear nearest to your body.

Your Skin has a major influence on your **operational effectiveness**. Your skin transmits vital signals to the brain including pressure, pain, heat and cold, all unwelcome distractions that can hamper your concentration when it matters. Armadillo Merino® next-to-skin clothing increases your comfort levels across a wide range of climatic zones and helps to **reduce your cognitive burden** so you can focus on the tasks at hand.

Your Safety is paramount to you, your family and your team. You are putting your body on the line and your next-to-skin garments are now your last layer of defence. That's right, your last line of protection! These vital garments must not melt, drip or catch fire, be free of clothing toxins and be safer and more comfortable to wear. Armadillo Merino® garments won't melt or drip and are inherently flame resistant up to 600°C without adding any chemicals (> 1000°F and at that temperature you're toast). We don't use PFAS chemicals so these garments are safe for you and the environment.

Merino Wool is an annually renewable, multi-attribute fibre that doesn't melt or drip, doesn't generate body odour and provides moisture management and thermoregulation in both hot and cold environments. An Armadillo Merino® garment made with 100% merino wool and worn against the skin will significantly enhance your safety, performance and comfort.

Sharing our Knowledge. At Armadillo Merino® we have combined our knowledge of merino wool fibre with the science of skin to create the most advanced and innovative range of next-to-skin performance clothing on earth, and in space.

Merino+ Technology, is a new generation of extreme next-to-skin garments. The overall performance of merino fibre is remarkable however we have enhanced your safety by combining superfine merino with specialist synthetic fibres to protect wearers who operate in the most extreme of hot and cold temperatures.

Discover our new range of Extreme Cold Weather Gear (ECW) (p4) and Extreme Heat & Flame Gear (EHF) (p2).

You are our Champion. Armadillo Merino® garments have been developed and tested by astronauts, special forces, pilots, firemen, search and rescue teams, motor sports and outdoor enthusiasts looking for the best in category garments. Champions chose Armadillo Merino® because your “comfort is the lack of discomfort” and because your safety is paramount. No second chances.

Armadillo Merino®

chosen by elite teams, specialist operators and a wide range of enthusiasts who love the look and feel of wearing Armadillo Merino® all day, every day.

EXTREME HEAT & FLAME GEAR (EHF) INCORPORATING Hotshot^{FR} FABRICS

Jonny Simpson

Hotshot FR fabrics – Many traditional FR clothing fabrics are unpopular because they are itchy, scratchy, hot, smelly, hard to care for and expensive to procure and maintain. Officers shouldn't compromise on their safety or comfort when seeking FR protection. The Hotshot FR fabrics combine wool (nature's high performance fibre) with engineered acrylic to produce a safe and highly natural breathable fabric with enhanced FR properties without compromising on wearer comfort, FR protection or cost. Your team will be forever grateful.

NEW

01 BLACK

FR BALACLAVA - 31305

FR Balaclava for protection against possible explosions or flames. Hinged design allows for easy venting, and can be worn with full face protection, or hinged down for venting. Extra long drop front provides added protection. Designed to be worn under a helmet with flatlock seams.

Sizes : S/M, L/XL

Fabric : 50% Merino Wool (18.5-µ), 48% Engineered Acrylic, 2% Belltron[®]

Fabric Weight : 220g/m² = 6.5oz/yd²

Garment Weight : 85g (M)

Features : Long Balaclava with flat smooth seams. Extra long drop front.

NEW

01 BLACK

FR FIRE HOOD - 31306

FR Fire Hood is made of a double layer of our unique merino blended FR fabric that is inherently protective, which allows for the ultimate in protection against radiant and intense heat without the risk of the protective nature being "washed out". Designed to protect the user's head, neck and shoulders from fire and harmful effects of heat and is comfortable under helmets, fireman helmets and for use with BA sets.

Sizes : S/M, L/XL

Fabric : 50% Merino Wool (18.5-µ), 48% Engineered Acrylic, 2% Belltron[®]

Fabric Weight : 220g/m² = 6.5oz/yd²

Garment Weight : 175g (M)

Features : Long drop front with hinged design. Designed for use under a helmet.

NEW

- 15 DARK NAVY

FR JAGUAR - 31013

FR LONG SLEEVE MOCK NECK

The FR Jaguar mock long sleeve short, delivers extra neck protection without constriction, making this an ideal garment to wear under body armour, reducing rubbing and abrasion with added protection from extreme heat or cold. The semi-fit cut and single needle stitching and make for stylish and practical garment.

Sizes : XS,S,M,L,XL,XXL,XXXL
Fabric : 50% Merino Wool (18.5-µ), 48% Engineered Acrylic, 2% Belltron®
Fabric Weight : 220g/m2 = 6.5oz/yd2
Garment Weight : 275g (M)
Fit : Regular Fit
Features : Mock neck with generous back length. Long arms with long comfortable cuff and thumb loops. Seamless underarm for no chaffing and seamless shoulders designed for load carrying.

EXTREME COLD WEATHER GEAR (ECW)

ClimbNow

We've all experienced wet cold and dry cold but how about extreme cold. Once you get below -20°C the body has to be protected to deal with a different range of challenges to ensure survivability. Controlling sweat and heat loss become life critical considerations. Our ECWG range has been developed to help operators survive in polar and high alpine conditions by keeping you "comfortably cold" when being tested by the coldest days of winter.

Our merino wool layering solution is designed to be an integral piece of your layering solution in the cold. Begin with the Merino Mesh Johnnies and Mesh Falcon. Their warmth to weight ratio, cannot be beaten and their ability to keep your skin dry. Next layer is the Falcon or Condor from our Raptor collection as either a next-to-skin or a light midlayer. Alternatively try the Lynx, our midlayer piece with its merino wool mesh lining for trapping air. Finally the Winter UBAC, and you have a layering solution for the most extreme conditions. Add in some Heavy Boot Socks to your top and bottom and you are ready to set off.

EXTREME GOLD WEATHER COMBAT SHIRT - 74001 (ECW COMBAT SHIRT)

Extreme cold needs extreme solutions hence this mid-layer garment. The UBAC incorporates a compact ponte knit merino fabric with a Hotshot FR woven fabric covering the sleeves and shoulders to protect from heat and flames. The two layers of merino help to maintain a more comfortable body temperature in extreme cold conditions. Canadian buttons replace hook and loop fasteners for silent operation. This UBAC shirt would be customised to your exact requirements with strategic placement of pockets, frag protection, colour matching and markings.

01 BLACK
21 RANGER GREEN

Sizes : XS,S,M,L,XL,XXL,XXXL

Outer Fabric : Hotshot FR woven ripstop fabric (50% wool, 48% PyroTex®, 2% Belltron) 220gsm

LYNX - 24021 LINED LONG SLEEVE ZIP TOP

A mid layer that can also function as the perfect baselayer. The Lynx is lined with a unique wool mesh that traps air and improves ventilation as well as breathability and has our popular single jersey outer. Perfect as a midlayer or a baselayer.

Sizes : S, M, L, XL, XXL, XXXL

Fabric : Outer : 100% Merino Wool (18.5-µ), Jersey Knit

Liner : 65% merino / 35% FR polyester

Outer Fabric Weight : 170g/m2 = 7.2oz/yd2.

Garment Weight : 302g = 10.65oz (M)

Fit : Regular

Features : Lined with merino wool mesh, 1/4 zip and zipper garage, long back and thumbholes provide increased comfort and protection.

ClimbNow

FR Merino Mesh provides optimal warmth without weight in the cold and allows the body to thermoregulate more effectively by trapping warm air when the body is cold and allowing heat and perspiration to dissipate when the body warms up. The Scandinavians worked this out last century. Our proprietary mesh combines superfine merino with FR polyester fibre to avoid melting, dripping materials while increasing fabric strength and durability. No smell, quick drying and almost weightless. These garments are life savers so don't leave home without a set.

NEW

FR MESH FALCON - 28211
LONG SLEEVE, CREW NECK, FR MERINO MESH

The Mesh Falcon is designed as the ultimate base layer in extreme environments. The wool mesh traps air providing added insulation, and the mesh design allows efficient moisture management. Figure hugging, and designed to be worn tight for added comfort under layers. The Mesh series will fast become your go-to base layer in extreme conditions

Sizes : XS,S,M,L,XL,XXL,XXXL
Fabric : 65% Merino Wool (18.5-μ), 25% FR Polyester
Fabric Weight : 75gsm (2.25 oz/yd²)
Garment Weight : 86g = 3.03oz (M)
Fit : Body Hugging Fit

Features : Merino wool mesh long sleeve crew neck with generous back length. Padded shoulders Long arms with long tapered cuffs and thumb loops. Seamless shoulders designed for load carrying. Flatlock stitching.

NEW

FR MESH JOHNNIES - 28352
LONG JOHN FR MERINO MESH

When the Mesh Johnnies are combined with the Mesh Falcon you have the ultimate base layer for extreme conditions. Wool mesh where you need it, with our jersey knit merino wool fabric through the crotch, and double fabric fly, the Mesh Johnnies are designed to keep your "stuff" warm and at the same time providing efficient moisture management.

Sizes : XS,S,M,L,XL,XXL,XXXL
Fabric : 65% Merino Wool (18.5-μ), 35% FR Polyester
Fabric Weight : 75gsm (2.25 oz/yd²)
Garment Weight : 100g = 3.52oz (M)
Fit : Body Hugging Fit

Features : Merino wool mesh, Jersey knit fabric through the gusseted crotch for comfort. Double layer jersey knit fabric over the fly to keep your stuff warm. Tagfree waistband.

ELITE

NASA. Testing our Cobra top on the International Space Station.

Elite is high performance protective wear engineered exclusively for professionals who demand the very best. These new and innovative fabrics were developed in Italy using compact® spun yarns that offer a smooth, silken feel whilst retaining incredible strength and abrasion resistance. Tested for intense activity under extreme conditions, the Elite Range has an athletic fit, designed to look great as you space walk or when you're out on the town.

PANTHER - 21011

LONG SLEEVE CREW NECK

Panther is a valuable long sleeve shirt for work and leisure. The semi-fit cut with single needle seam stitching makes this a stylish garment that hides the extreme functionality that the Panther can deliver. This shirt can be worn as station wear, on a job or out on the town.

Sizes : XS, S, M, L, XL, XXL, XXXL, XXXXL*
Fabric : 100% Merino Wool (18.5-μ), Jersey Knit
Fabric Weight : 170g/m² = 5.0oz/yd²,
Garment Weight : 205g = 7.23oz (M)
Fit : Regular

Features : Crew neck with generous back length. Raglan sleeves. Long arms with long comfortable cuffs and thumbholes. Seamless underarm for no chaffing and seamless shoulders designed for load carrying. Single needle stitching.

- 01 BLACK

TIGER - 21021

LONG SLEEVE ZIP NECK

Tiger is at home in extreme conditions. Tight fitting with thumbholes for extra wrist and knuckles protection. The high neck zipper allows venting when required but also traps in warmth and protects the neck area against cold or abrasive outer layers.

Sizes : XS,S,M,L,XL,XXL,XXXL
Fabric : 100% Merino Wool (18.5-μ), Jersey Knit
Fabric Weight : 170g/m² = 5oz/yd²,
Garment Weight : g = 0oz (M)
Fit : Regular

Features : Zip neck with generous back length. Raglan sleeves. Long arms with long comfortable cuffs and thumbholes. Seamless underarm for no chaffing and seamless shoulders designed for load carrying. Single needle stitching.

RAPTOR

The Raptor range is made from an open rib knit fabric to help your body thermoregulate in all temperatures. When it's hot, heat and perspiration are released to keep you cooler and drier. When it's cold, your Armadillo works as an insulator, trapping still air to keep you warm. Raptor combines softness and strength with natural stretch for maximum durability and performance in all environments. The figure-hugging fit, ensures that the Raptor range is a versatile baselayer.

Armadillo Merino® Difference

At Armadillo Merino®, we care about you knowing that the kit you wear could save your life. We take this responsibility seriously and think about it everyday. Our garments are designed with you in mind.

Design “Focusing on the details”

The details make the difference. All of our garments have longer backs, seamless shoulders, longer arms and longer cuffs with thumb loops as we design for the tactical and professional user. No annoying labels on the neck, and discrete branding make our products different. Add to this, we only select the finest merino wool, as not all merino is created equal, and by partnering with the best manufacturing partners, and you have some of the details that go into each and everyone of our products.

We are proud of our garments as they have been used in space and are regularly used in the most extreme environments in the world.

SUSTAINABILITY AND MANUFACTURING

At Armadillo Merino® we monitor our supply chain from sheep stations in New Zealand through the various processing stages to the delivery of professional grade garments for tactical and professional operators around the globe. Our products are cut and sewn in Lithuania, Bosnia and Portugal, while our socks are knitted in Czech Republic and Portugal in EU certified facilities.

We use hand selected ZQ™ certified merino fibre for our performance garments. ZQ™ certified merino is an annually renewable fibre prized for its softness, strength and durability. The ZQ™ certification of our merino fibre guarantees the highest quality of our merino fibre with traceability back to the sheep stations. The certification has standards that cover animal welfare; environmental, social and economic sustainability.

MERINO WOOL

Merino is a remarkable fibre and works in conjunction with our body. Our body responds to keep our core temperature as stable as possible through the vast range of exertion and climatic changes which we are exposed to. Armadillo Merino®'s natural buffering helps the body maintain a stable core temperature as it assists the process of heat loss in hot conditions and keeps the wearer warm in cool and damp conditions with the added advantage of no melt, no smell and more.

ANTI ODOUR

No smell - Naturally anti-bacterial, wear Armadillo for days on end, and it will not smell.

UV PROTECTION

Natural UV protection against the sun's harmful rays. Armadillo Merino® naturally absorbs UVA and UVB rays to offer you up to SPF 50 protection, depending on the fabric.

FLAME RESISTANT

No melt, no drip - Natural flame resistance to 570°C (1058°F) and with no toxic fumes. This is achieved by having a high natural nitrogen content (14%), combined with a high relative moisture content. Compare this to synthetics that can melt at 170°C (338°F) and in Armadillo Merino® you have some serious extra protection.

MOISTURE MANAGEMENT

Armadillo adsorbs your sweat then releases it into the air more efficiently than any synthetic. It can also absorb up to 30% of its own weight in moisture without feeling wet, leaving your skin dryer and more comfortable.

THERMO-REGULATION

Hot or Cold, always comfortable - When it is cold, Armadillo will keep you warm and when it is hot Armadillo will help to keep you cool too.

STAMINA

Go further on less. Armadillo garments give you the edge by superior thermoregulation, moisture management and in delaying the onset of sweat reducing the rate of moisture loss and your calorie burn. Stamina, the ability to go faster, longer and stronger.

Ice Run

TAILORMADE

If you have an industry specific requirement then we can help you through our Armadillo Merino® Tailor Made program.

Talk to us about combining the best designs, fabrics and construction requirements to fulfil the demands of your particular requirements. Bespoke options include logo embroidery, pantone colour matching and customised styles.

Minimum production runs will apply.

CARE INSTRUCTIONS

Armadillo Merino® resists the build up of odour so can be worn for longer without smelling (days, or even weeks, if you have to). And when you do finally have to wash it, nothing could be simpler.

Machine Washable

No need for high temperatures or special detergents because merino is self-cleaning in water and naturally releases dirt and odour even in a cool wash. Wash in water at up to 40°C (100°F) with your other clothes using your usual detergent.

Quick Drying

You can tumble dry on low heat, however we recommend line drying to prolong your garments life

FIT GUIDE

All Armadillo Merino® garments are long in the body.

Regular Fit - has some room to move. This style allows easy movement and can be worn as either next-to-skin or off duty by itself.

Athletic fit - follows the contours of the body, but still has a little room to move. The cut is more tapered around the hips and waist.

Body Hugging Fit - is designed to be snug fitting and for use as next-to-skin layer under your uniform.

<p>WOMEN'S BODY MEASUREMENTS</p> <p>MEN'S BODY MEASUREMENTS</p>	<ol style="list-style-type: none">1. Neck - Measure around the neck.2. Chest - Measure the fullest part of the bust , keeping the tape level with the floor.3. Waist - Measure around where you naturally wear your pants.4. Inseam - Measure from the crotch to the ankle bone.5. Sleeve - Bend your elbow and measure from the middle of your neck to your wrist.
