

Pillowpacker® **Premium Inflatable Travel Pillows**

Pillowpacker® Pillows were invented by travellers for travellers. These premium inflatable travel pillows are made in Ottawa, Ontario, Canada, of the highest quality materials. Our pillows have been tested by travellers and are available online at www.pillowpackers.com. Pillowpacker® Pillows are the choice of discerning travellers who appreciate comfort and security when they travel. If you carry your own pillow when travelling, you will love our pillow!

Pillowpacker® Pillows provide the comfort of home wherever or however you roam

Pillowpacker® inflatable down or down alternative travel pillows provide a comfortable, sanitary and highly portable solution for a variety of travel and vacation needs:

- **Business and vacation travellers** – personal, sanitary and adjustable pillow providing contour neck support for plane or vehicle and hotel; lightweight and packs in its own sack or flat in a suitcase.
- **Backpackers, hikers, and wilderness campers** – Comfort of a real pillow while being very lightweight and highly compressible; can store valuables inside pillow.
- **Boaters and RV enthusiasts** – comfortable of a full-sized pillow in compact, stowable size
- **Home and cottage use** – extra pillows for guests in minimum space
- **Special needs** – Supports neck or injured or painful joints.

Small Pillow Delivers a Good Night's Sleep

Measuring approximately 19X14 inches (48X36 cm), the Pillowpacker® Pillow is about half the size of a regular pillow...but be assured that small size does not negatively affect its performance. Because of the unique design of the inflatable inner pillow, one Pillowpacker® Pillow can replace one or even two full size pillows, depending on the sleeper's needs and sleeping preferences.

The sleeper's head rests comfortably on the pillow, whether sleeping on one's side or back. The Pillowpacker® Pillow also makes an ideal "knee" pillow for those people who sleep with a pillow between or under their knees to reduce back strain.

What Makes a Pillowpacker® Pillow So Special?

Each pillow set consists of four parts: The inner inflatable pillow, the outer fibre-filled pillow, the home-style pillowcase (your choice of colours) and a nylon stuff sack.

Inner Inflatable Pillow - Inner inflatable pillow made of polyurethane film with an easy-use twist valve. It has a hollow oval that provides a gently contoured pillow that can be adjusted in firmness.

Outer Fibre-filled Pillow - The outer pillow contains a minimum of 5 oz/ 150 g down or down alternative and encases the inner pillow.

- **Premium Brome Duck Down:** From the famous duck farms of Brome Lake, Quebec, our duck down is processed and laboratory tested to exceed all Canadian and International cleanliness standards. It has a minimum of 75% down clusters and 600 loft factor in shell of down-proof ticking.
- **Ultimate Comfort Hutterite Goose Down:** From the Hutterite communities in Alberta, Canada, our goose down humanely harvested from mature geese and is among the finest quality available with a minimum of 80% down clusters and 700 loft factor in a shell of down-proof ticking.
- **Hypoallergenic Microfibre Down Alternative:** The microfibre pillow contains six ounces (180 grams) of Eco2 Suprelle Micro fibre in a shell made of 260-thread count white 100% cotton down-proof ticking. Due to the superior polyester fibres, Eco2 Suprelle Micro is the latest innovation in microfibre technology. A revolutionary manufacturing process creates a filling that is fluffier, softer and rebounds better than ever before.

Home-style Pillowcase: The pillowcase is 100% cotton percale for easy washing and comfort. The home-style pillowcases have an inner protective flap to help keep the pillow clean. One pillowcase is included with the purchase of a Pillow Set. Extra pillowcases in a variety of fashion colours and white are available for purchase.

Stuff Sack: Transport your Pillowpacker® Pillow rolled up in its own tough, durable nylon stuff sack, which is water-resistant and can be easily be stuffed in your carryon.

Easy to Use and Easy to Care For

Pillowpacker® Pillows are easy to Inflate, deflate and adjust using the twist valve, accessible by way of a zipper opening in the outer fibre-filled pillow. To pack, simply open the zipper and turn the valve counter-clockwise to allow the air to escape. There is no need to disassemble the pillow set when packing. Gently apply pressure to deflate and either roll and place flat in your luggage or leave it rolled and stuff it in its own water resistant stuff sack made of durable nylon.

With proper care, the pillow can last for years of travelling. The outer fibre-filled pillow should be aired and fluffed occasionally and laundered when needed per the instructions included with the product. The 100% cotton percale pillowcases can be washed regularly.

Silk Sleepers – A Perfect Companion for your Pillowpacker® Pillow

Pillowpacker® Silk Sleepers – 100% silk “sleeping bag” liners -- are manufactured to our design specifications in China, home of the world’s finest silk. Silk liners are an undervalued item of travel gear, contributing to travel comfort in a number of ways. Incredibly lightweight, the natural moisture wicking and temperature regulating properties of silk means they both cool and warm as needed. The fine texture of the silk also helps protect the sleeper from dirt, allergens and biting insects.
