

Instruction Guide

DO NOT DISCARD REUSABLE TRAYS:

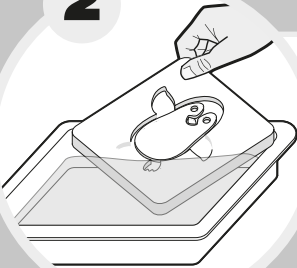

1

(1) Start your new creation by adding the correct amount of Solution Mix and clean water to the reusable clear solution tray on back side of package. SEE MIXING CHART for correct amounts of water and Solution Mix needed. If the indicated proportions of water and Solution Mix are not followed the Solution will not work properly. Stir until the Solution Mix is completely dissolved in the water.

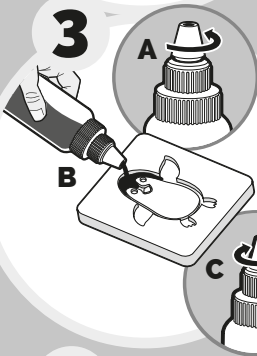

NOTE: Your Solution can be reused over and over. Store in a safe location and cover. Do not add more water when reusing or the effectiveness will be reduced.

2

(2) Choose a character mould. To prepare it for gel and ensure easy gel release, give it a quick dunk into the Solution, lift out, tap & shake off excess solution.

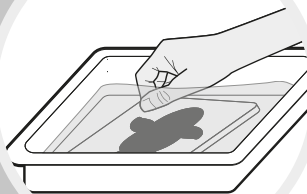

3

Under the cap of each Gelz squeeze bottle is a sealing plug which must be removed prior to use. Unscrew the Gelz bottle cap, remove plug and dispose of in household trash and replace cap on the bottle.

(3) Start your creation by gently **twisting the Gelz cap counter-clockwise to open**, and then squeezing the coloured gel into your character mould. It is recommended to not over fill the mould past the top edge of the mould. When done, be sure to **close each gel by gently twisting cap clock-wise**.
NOTE: AFTER YOU GENTLY TWIST TO OPEN CAP, DO NOT PULL CAP OFF.

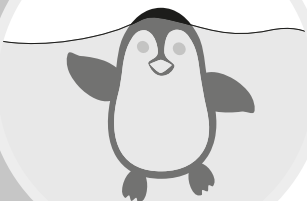

4

(4) Place the Gel-filled mould into the Solution tank once again, this time submersing it completely. While submersed in the solution, wiggle your mould side to side gently until your character releases from the mould. It will release in 10-30 seconds. Once creation releases from the mould let it remain in the solution tank until it firms. Be gentle touching the Creation during the firming process.

NOTE: For a softer creation remove from Solution sooner. For a firmer character leave in Solution longer. If Creation is not firm enough it can be placed back into Solution until desired firmness is reached.

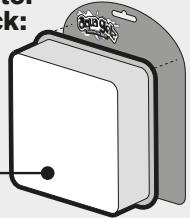

5

(5) Test your Creation by gently squeezing it from time to time. Once your creation has reached the desired firmness, transfer it into another container filled with only plain clean water or Display Fish Tank (Aqua Gelz Deluxe Playset only). The firming process will stop once taken out of the Solution. It's time to have hours of fun playing with your new creation.
NOTE: Always store your creation in water or it will harden and shrink. DO NOT throw away your Solution or Solution Tray as both can be reused again and again. Store in a safe location and cover when not in use. When reusing the solution Do not add more water. To make a new batch of Solution start with Step 1 & follow the Solution Mixing Chart.

Starter Pack:

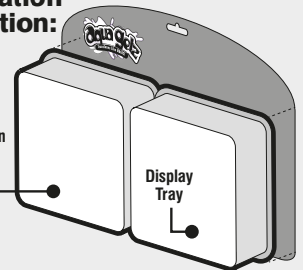

Solution Tray

Creation Station:

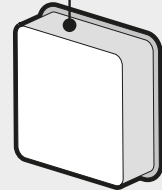

Solution Tray

Display Tray

Deluxe Set:
