

Doorway with Trim

Determine Door Width (doorways with trim)

- ❶ Width of door opening
- ❷ Width of door opening plus trim widths on both sides

Select;

- ❶ If you want your trim to be visible
- ❷ If you want to completely hide your trim

Result; Door Width = _____

Determine Door Height

- ❸ The exact height of your door including your top trim

Result; Door Height = _____

▶ Order; W: _____ x H: _____

Please refer to our website for our standard barn door size. Typically barn door sizing **is equal to or greater than** the outside trim to trim measurements

Important Note: Do not leave more than ½” between your finished floor and the bottom of your door or your door will not connect with your Door T-guide

Doorway, No Trim

Determine Door Width (doorways less trim)

- ❶ Width of door opening
- ❷ Add 2” per side; total 4” to ensure that your opening is completely covered

Result; Door Width = _____

Determine Door Height

- ❸ The exact height of your door

Result; Door Height = _____

▶ Order; W: _____ x H: _____

Please refer to our website for our standard barn door size. Typically barn door sizing **is equal to or greater than** the outside trim to trim measurements

Important Note: Do not leave more than ½” between your finished floor and the bottom of your door or your door will not connect with your Door T-guide

The above are given are suggestion for a minimum door size to cover your existing opening. You can always have a larger door
