**PORTABLE UV SANITIZING BOX**

## Name of Product Component

## Specification Parameters

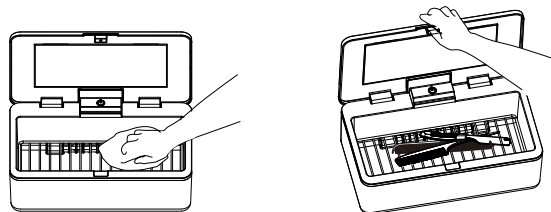

Rated Voltage	5V DC
Rated Input Power	4W
UV Bulb Type	T5 2W Quartz bulb 254nm
Suggested Time of Disinfection	3 minutes
Lifespan of UV Lamps	5000 hours

## Features

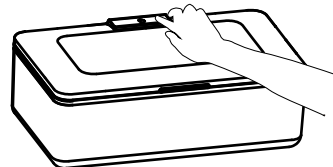

1. Great for sanitizing salon tools, mobile phones, or any items that needs to be sanitized quickly.
2. High quality quartz lamp, 20% more efficient than most high boron lamps. Kills 99% bacteria and virus in less than 3 minutes.
3. Reflecting mirror and steel shelf ensure items are fully exposed to UV lights from all sides.
4. Safety microswitch, automatically cut off the power when door is opened, preventing users being exposed directly to the UV lights.
5. Travel friendly, compact size with USB cable. Can be used at home, in salon, in office, or even during a car ride.

## Operating Instructions

1. For first-time use, please clean the box and the shelf thoroughly. Make sure they are completely dry before using.
2. Put the tools and accessories that need disinfection on the shelf in the box. Close the door and connect the power supply.

3. Press the button and hold for two seconds. When the purple light is on, the device starts working.

4. To protect users from hazards of UV lights, if the door is opened during sterilizing process, the microswitch will be activated and automatically switch off the unit. Once the door is closed, the unit will resume working.

## Warning

- UV light is hazard to your health, please don't expose yourself directly to the UV lights.
- This product should never be operated by or in close proximity to children.
- Unplug from electrical outlet when not in use.
- Do not operate this device if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped in water.
- Do not use outdoors. This product is designed for indoor use only.
- Do not place device where it can fall or be pulled into a tub or sink. Do not place in or drop into water or other liquid, and always store in a dry place.
- Never attempt to disassemble or repair the product by yourself.

## Maintenance

1. When cleaning the unit, use slightly wet cloth or towel, with neutral detergent; do not use acid, alkaline or corrosive detergents.
2. After usage of the unit, disconnect the power line. If the unit will not be used for a long time or needs maintenance, please make sure the power is disconnected.
