

ACID CALMTM

for OCCASIONAL HEARTBURN*

With PepZinGI® Zinc-Carnosine

A 2018 survey of 71,000 Americans evaluated the burden of gastrointestinal symptoms in the United States: over 30% reported having occasional gastrointestinal symptoms, including heartburn and reflux. Many conventional treatment options are effective but often serve as short-term relief and can lead to comorbidities. ^{2,3}

GASTROINTESTINAL HEALTH

Digestion starts with the first bite of food; food then enters the esophagus and passes through the gastroesophageal sphincter and into the stomach and small intestine for breakdown and proper absorption. Changes in the gastroesophageal sphincter pressure or an increase in abdominal pressure can result in the reflux of stomach contents into the esophagus. Excessive acid production, lifestyle factors, diet, overeating, meal timing, and volume can all influence gastroesophageal sphincter pressure and gastric emptying time.

When it comes to digestive health, it is best to consider the digestive process from start to finish. A deficiency in our natural production of digestive enzymes can be an underlying cause of gastrointestinal complaints, including occasional heartburn and indigestion.* Acid Calm contains Thera-blend™ enzymes to support proper breakdown, absorption, and utilization of nutrients from the foods we eat.

MARSHMALLOW ROOT

Marshmallow Root (*Althaea Officinalis*) has a high protein and mucilage-carbohydrate content that the body can manufacture the necessary materials for new tissue production. Due to its high levels of mucilage, Marshmallow can surround and expel foreign and toxic matter, providing a soothing effect on inflamed mucosal membrane tissue.*4

Papaya leaf naturally contains proteolytic (protein-digesting) enzymes and has been studied for its soothing benefits and cleansing activity within the GI tract.* Papaya leaf supports biological activity in removing improper proteins, promoting less stress on the body's natural digestive processes.*5

Gotu Kola (*Centella Asiatica*) has powerful antioxidant properties and provides additional support for soothing gastrointestinal discomfort by strengthening the walls of the gastrointestinal tract.* Gotu Kola is a natural diuretic as it is rich in B vitamins and potassium.*

PepZinGI® ZINC-CARNOSINE

PepZinGI® is a chelated Zinc-Carnosine that combines trace mineral zinc and L-Carnosine: a

OUR QUALITY

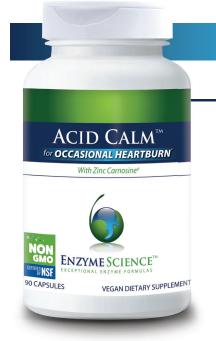

SUPPLEMENT FACTS

Zinc (as Zinc Carnosine [§])	2 mg
Marshmallow Root	95 mg
Papaya Leaf	95 mg
Gotu Kola (aerial)	48 mg
Amylase Thera-blend™	3,000 DU
Zinc Carnosine§	10 mg
Cellulase Thera-blend™	600 CU
Lipase Thera-blend™	200 FIP

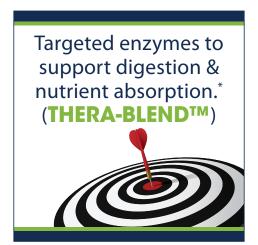

OTHER INGREDIENTS: 100% Vegetarian Capsule (cellulose, water)

CONTAINS NO: dairy, egg, preservatives, salt, sucrose, soy, wheat, yeast, nuts, corn, gluten, casein, potato, rice, artificial colors or flavors.

RECOMMENDED DOSAGE: Take 1 capsule at the end of a meal to calm digestive discomfort.* Acid Calm™ can be taken any time digestive discomfort begins.

3 IN 1 FORMULA

dipeptide of beta-alanine and L-histidine. PepZinGI® has been well researched and shown to support indigestion and maintaining healthy mucosal integrity. 6,7,8

The gastrointestinal benefits of Zinc-Carnosine are unique as it does not interfere or disrupt the normal digestive process like traditional methods. When zinc is bonded to L-carnosine, it dissociates in the stomach at a slower rate. Research has shown the combination of chelated Zinc-L Carnosine remains in the stomach twice the amount of time when given individual zinc and L-Carnosine, making this formulation superior to single interventions.

ACID CALM™ ACHIEVING OPTIMAL HEALTH*

The digestive system is the mechanism for nourishing the entire body and ultimately achieving optimal health. Stress, environmental factors, poor diet, alcohol can all affect the relaxation of the gastroesophageal sphincter.

Supporting digestion with enzymes while maintaining healthy mucosal integrity is essential.*

Enzyme Science Acid Calm contains vegetarian enzymes and botanicals to support healthy digestion and calm symptoms associated with gastrointestinal distress.* In combination with papaya leaf, Thera-blend™ enzymes are comprised of multiple variants blended to work synergistically through the broad pH range of the human body. Thanks to its cooling properties, the demulcent Marshmallow Root is well known for soothing irritated membranes.* Finally, Zinc Carnosine helps strengthen the mucosal lining of the stomach, acting as a buffer to gastric acid.*

While many products are formulated to address symptoms, Acid Calm contains natural enzymes that work with your body to soothe indigestion and enhance your body's natural digestive process.* Acid Calm provides a synergistic approach to supporting healthy digestion and proper absorption of key nutrients.*
