Design update
Upper clamp

For Sanremo and Rancilio portafilters

Date: 09-08-2022

puq

Problem with Sanremo/Rancilio portafilters (1)

Standard portafilters have the same handle and filter basket outer diameter.

Sanremo/Rancilio portafilters (red line) have a bigger diameter than the filter basket (blue line)

puQ

Problem with Sanremo/Rancilio handles (2)

The portafilter hits the sensor, while the filter basket is not in center of tamper base yet.

Section view PUQpress Q2: Filter basket is in center of tamper base, but the portafilter hits the sensor (blue cirle)

Solution

The solution is to remove material from the sensor mount as is shown in the blue circle.

The portafilter is in center of the tamper base and doesn't hit the sensor.
