#### COFFEE + TEA

The C'2c/Core is a stripped-down version of our Cameo/Classic. We have merely removed some nonessential parts, reduced the cost and made it more accessible for those who aspire for a Cameo but have a restricted budget. Featuring hot water coming directly from the coffee outlet and our e'Levelling brewing unit, this machine remains powerful enough to produce 175 espresso as well as 170 hot water products per hour.

#### Colour: **TEMPEST**

IVERSYS

OVERVIEW

(IVERSYS

	Standard colour	The standard machine colours are Earth and Tempest for the classic range and Raw for the Cameo ST range.
.26	Customised colour	A machine with customised colour can be designed on request only.
ebp	Steam wand with Everfoam	An air injector is added to the steam system which then enables the production of milk foam automatically with the steam wand.
X	Without steam wand	No steam wand is installed (e.g. C'2m/Core).
	Hot water outlet	This is a separate outlet dispensing hot water only.
	High hot water outlet	The high hot water outlet allows you to use cups that are up to 195 mm high.
	Without hot water outlet	No separate hot water outlet is installed but the hot water can still be dispensed through the coffee outlet
	Auto Adjustable hot water temperature	The temperature of hot water can be adjusted on the machine screen according to your preferences. (not possible with the Cameo C'2c).
	Auto Adjustable Americano temperature	It is possible to automatically adjust the water temperature for an Americano beverage. It is not available in combination with C'choco.
	1.5-Step	The 1.5-Step is an additional milk arm which dispenses perfectly textured foam at the same time as the espresso, allowing the Barista time to concentrate on the customer and Latte Art.
	Cold foam	Cold milk foam can be dispensed.
12	2 milk types	This option enables the possibility to dispense two different types of milk with no cross contamination.
	Undercounter ground coffee disposal	The under counter ground coffee disposal allows a greater amount of coffee grounds directly into the bin provided on site, inside the furniture.
1	Powder chute	This option allows you to use ground coffee in the decaffeinated powder chute as well as introduce ground coffee directly in the brew chamber.
1x 🔊	Single bean hopper (no powder chute)	The single bean hopper can hold up to 2.4 kg of coffee beans. With this configura- tion, it is possible to use both grinders in order to make two types of grinding with the same beans.
4+	PowerPlus (5.6kW steam boiler power)	If your electrical network allows it (1x25A, 2x16A, 3x16A), it is possible to order thePowerPlus option. The steam boiler will be powered by 5.6 kW instead 2.8 kW increasing significantly its performance.
	Bean hopper level alert	Light barriers are installed on each side of both bean hoppers and will automatical- ly warn the user that the bean hopper is almost empty, avoiding waste of products and planning refill ahead.
6	Crema Nozzle (in combination with Coffee Nozzle or Espresso Nozzle)	The crema nozzle option makes it possible to stabilise the crema on top of every coffee product.

	Single coffee outlet	The single coffee outlet option enhances customer experience for self-service machines. It's very easy to swap between the single outlet and the double outlet and back at any time.
	Cup centering guide	It is a guide on the drip tray that helps center cups under the coffee outlet.
	High feet and large grounds drawer	The high feet are 50mm higher than the standard feet. The large grounds drawer is 80% bigger than the standard one. It contains in total 0.7 kg.
SELF SERVICE	Self-Service preconfigured (Single coffee outlet, cup cen- tering guide, without 1.5-Step, without steamwand)	With this option, your machine is pre-set as a self-service machine including a single coffee outlet, a cup centering guide, without 1.5-Step and without a steam wand.
	Bean hopper lock	The bean hopper lock allows secured access through the use of a key. (e.g. self-service machines).
د	Red lid (cleaning balls)	The lid of the cleaning ball dispenser is delivered in red to avoid mistakes during bean refilling or the machine cleaning.
	e'Levelling	Our automatic e'Levelling system has the ability to initiate a movement to the brewing chamber, creating a vibration which enables the powder in the chamber to spread more evenly, leading to a better, more consistent extraction.
	CCI/CSI/API Connection	This feature allows you to connect your coffee machine with another interface such as a payment system solution. (CCI: Coffee Credit Interface; CSI: Coffee Standard Interface; API: Application Programming Interface).
	e'Connect (Telemetry)	Our e'Connect enables all stakeholders to have transparency on key performance parameters of the machines, remote control, priority management, operational efficiency, data protection. With this feature you can for example remotely check the status of your machine (number/kind of products, cleaning status, usage,).
	Predisposition choco 1 outlet	To use your machine with the C'choco module, this option is mandatory. It contains all the needed hydraulic, mechanical and electrical connections.
1	Lockable Lid (choco accessory)	The lockable lid allows secure access to the power canister through the use of a key. (e.g. self-service machines).
2x 🗓 🗓	Milk container 2x4.5 Liter (fridge accessory)	When ordering your C'fridge, you can choose between 1 or 2 milk containers. In this case the milk container is split into two and allows you to store 2 types of milk.
