

theTool™ JL

Swedish design from Guitar People

Guitar People is proud to announce a new electric guitar. We call it theTool JL. It represents a new development in our theTool line.

This time around Guitar People worked with Stockholm designer Jonas Lindkvist and master luthier Arne Arvidsson to create an electric guitar with modern lines and great playability. The minimalistic, Swedish design reveals the essential beauty of the electronic guitar.

A quality guitar with flexible electronics and superb sound, theTool JL is the result of thirty-five years of guitar making and a vision of the future.
