

Summer Travel WITH COCONUT OIL

RASH & CHAFING RELIEF

The healing properties of Coconut Oil are effective in treating & soothing rashes by relieving itchy skin, reducing redness, as well as smoothing and softening the infected area. Coconut Oil's lauric acid can also help control fungal and bacterial infections such as eczema. Peter Lio, M.D. at Northwestern University Feinberg School of Medi-cine has researched the use of coconut oil for eczema and has the data to back this up.

BUG BITE RELIEF

Bugs and mosquitos are an inevitable part of any outdoor sport, but that doesn't mean you have to suffer the stings and bites that come with them. Ditch the harsh chemicals of other sprays and opt for Conscious Coconut oil instead—it will reduce the sting, redness & itch within a few minutes.

Calmit Down WITH COCONUT OIL

HEAL CUTS + WOUNDS

Coconut Oil can effectively heal wounds & prevent scarring quickly due to its antibacterial, anti-inflammatory, moisturizing, & healing properties. Coconut Oil encourages the skin to increase collagen production which helps skin cells repair themselves. It also reduces inflammation so the body can focus on the damage and also minimizes the chances of infections that can slow down the healing process. Apply Conscious Coconut on the wounded area 2-3 times daily for best results.

SOOTHE SUNBURNS

If you love the sun but want to stay protected naturally, there's good news for you! Coconut oil has anti-inflammatory and antimicrobial properties that prevent sun damage and treat sunburns. The good saturated fats treat peeling, dry skin and renew skin cells naturally. And the naturally existing lauric acid in Coconut Oil reduces pain, itchiness & redness so you wake up glowing not toasty.

Apply twice daily, to help trap in all that moisture. Also, keep in mind that sunburn causes dehydration, so make sure you're drinking enough water!

TESTIMONIALS

A perfect companion for my travel and board bag! Coconut oil is a 'Swiss Army knife' of uses, and Conscious Coconut has elevated a simple oil to a humanitarian benefit that helps nurture one's inner peace too.

I've been using their coconut oil for years but was hesitant to buy these wipes. I used one after paddleboarding last weekend and it left my skin really smooth even though I was burned. I had a little leftover and used it for a rash on my hand - when I woke up it wasn't there anymore! Happy to see there's a 25 pack.

This product makes traveling so easy. I use coconut oil for everything- hair, skin, lips, sunburns, rashes, cuts... and the list goes on. Before Conscious Coconut oil I had to travel with a bunch of different products that just took up space in my carry-on and always put me dangerously over the limit. This tube does the work of 10. The travel size allows me to bring this with me everywhere and the pretty packaging is a bonus!

I forgot to wear sunscreen last week because it was cold and I got fried! Amateur move ha. I used a wipe before going to bed and I was surprised I didn't wake up red and in pain. They really work!
