

## Custom Shape Shade Kit Instructions

Custom orders are typically double the price of a comparable SPIDERWEBSHADE shade top. Custom shape shade tops can range in price from \$100 to \$300. When you place your order for the custom shape shade top, we will put the cost of the kit towards your shade top total.

We are so excited to create this one-of-a-kind custom shape shade for you! Included in your custom shape shade kit you will receive an Intake form, and a large sheet of visqueen plastic which will be used to create your template. To complete your template, you will need strong tape and a thin sharpie. Please include your name, shipping address, phone number and email on your intake form.

Take your time when creating this template to ensure we can make the best fitting shade top for your vehicle. First, tape the plastic to outside of the cage. When taping the plastic, place the tape securely and in all four corners so that the plastic is taut. Once you have your plastic in place you will trace the inside of the cage with a sharpie so that we will have a replica of your cage. View images below for reference:

After you have traced the inside of the cage with a sharpie, mark the areas where you would like grommets for connections points on your top. You have now created your custom shape shade template. Mail us your completed custom shape shade template along with your intake form to:

**SPIDERWEBSHADE**
