Cover Area	200 m ²	
Operation Type	Electricity	
Machine Dimensions	W.310 x H.185 x L.320mm	
Re-Heating Time / Start Type	3min / Timer Control	

Instructions

1. Connect the power and turn it on, the power indicator light will turn on and the machine will automatically enter the heating state. Heating up takes about 3 minutes.
2. Once ready, the green indicator light on the top lights up, at the same time add 100ml of special disinfectant to the upper bottle of the machine
3. Depending on the machine and the control way, the operation is as follows:
 - a. **Remote Control:** Plug the remote receiver into the back of the machine, press any key on the remote control and the machine starts to spray smoke
 - b. **Wire Control:** Plug the remote controller into the back of the machine and press the button on the remote controller. The machine will start to spray smoke
 - c. **Timing Control:** Adjust the timing dial on the back of the machine as required (up to 5 minutes can be set) and the machine will start to spray smoke
 - d. **Automatic control:** After turning on the power switch and heating up, the machine will automatically start spraying smoke
4. The longest smoke spray at a time is about 20 seconds, then it re-enters a heating state. After heating, it will automatically start spraying again.
