

PSO1 STEALTH

The PSO-1 socket outlet box made by Allbro has been a familiar sight in homes and public spaces around South Africa for more than 40 years now.

The tried and tested little enclosure has proven itself in some of the harshest environments and has remained the outright industry standard in the face of numerous foreign products being offered.

While the trusty and familiar favourite PSO-1 will still be available for years to come there has been an increasing number of requests for the company to provide the option of an up market version.

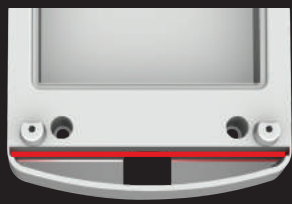

Allbro has called its newest arrival - "PSO-1 Stealth". At first glance it is apparent that there is a dramatically different appearance. Looking more closely it becomes evident that this new product also has some noteworthy features that have been introduced into the PSO Family.

INSTALLATION:

Flush Mounted:

STEP1:

Cut the PSO1-Stealth on the provided cut lines.

STEP2:

Once optional cut-section is removed, PSO1-Stealth fits between two bricks making installation simple, easy and elegant.

Surface Mounted:

*** NO CUTTING REQUIRED FOR SURFACE MOUNTING**

Place the PSO1 Stealth in the desired area and fix on the wall using 6mm Nail in anchor screws. This weatherproof plugbox leaves you with a modern finish PLUS all the benefits of the original plugbox, you know and have trusted for 40 years!
