Using Polishes, Conditioners and Oils.

Our polishes, oils and conditioners are easy to use.

Simply apply the product with a clean cloth to a dry board. Work the conditioner in in a small circular motion, working with the grain.

If the wood is 'thirsty' it will absorb very quickly, more can be applied as you wish.

Either buff to a shine or leave overnight to soak in.

In the case of using Mineral Oil, wipe off any excess within a couple of minutes.

Wax based polishes are all made from natural ingredients, i.e pure beeswax, pure walnut oil, pure lavender oils.

We do not use turpentine or similar carriers for any of our products.

Mineral Oil based products.

Specs:

British Pharmacopoeia usp 178.3620(a)
