Workplace Equity, Inclusion and Diversity Programs

An organization is only as good as its culture—and building that culture is not only a role for HR, it's every manager's and employee's responsibility.

Ensuring equity is essential for improving staff mental health and well-being.

unlearn's Workplace Equity Programs support organizations that are developing and nurturing cultures which encourage equity, inclusion, and diversity.

Our interactive education programs and consulting services are designed to create a dialogue around discrimination, stereotypes and other important social issues. The workshops help participants to explore their unconscious biases and examine how they can be reinforced by the media, their experiences and their relationships.

Our aim is to encourage participants to develop an equity lens by eliminating stereotypes and challenging societal norms that marginalize others.

Workshop topics include, but are not limited to:

- Counteracting bias, stereotypes, and micro-aggressions
- Power & Privilege
- Fostering an Inclusive Climate
- Intercultural competence and cultural humility
- Diversity, equity, and inclusion: from basics to advanced skills
- Inclusive communication skills
- Unpacking white privilege and promoting racial justice
- LGBTQ+ Awareness in the workplace
- First Nations, Metis, Inuit Awareness
