## HOW TO USE EXPANSION PANEL WITH RIDESAFER TRAVEL VEST

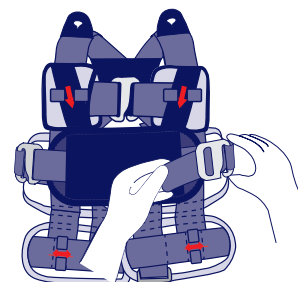

For use when extra width is needed for correct and comfortable fit of the RideSafer Travel Vest.

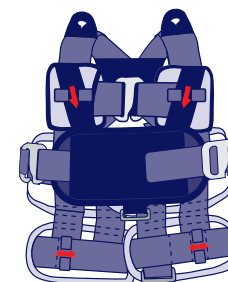

The Expansion Panel is an add-on piece to the RideSafer Travel Vest.

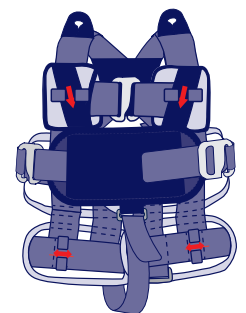

Insert the hook of the Expansion Panel into the loop on the vest.

Put the adjustable side with the hook and adjust the width to fit snugly by pulling on the adjustment strap on the expansion panel.

Once the panel is snug around the child's waist, attach the Velcro for a secure fit.

Attach the crotch strap to the ring on the expansion panel, then to the crotch strap rings on the back of the vest.
