

# Edo Fountain

Let's learn about the Edo Fountain

**PRODUCT DESCRIPTION:** A simple natural boulder becomes so much more when its core is revealed. A section is removed from the top, polished and dished slightly to allow a pooling of water, inviting the birds to drink. Each is carved from naturally formed granite boulders, meaning they're completely unique in color, shape, and size

The stone darkens when wet, here are examples of The Edo Fountain when it is running. All fountains on this document are for reference and have already been sold to other nature enthusiasts.
