

## NATURAL EDGE HARDWOOD PRODUCTS

Using nature as our blueprint, we create functional sculpture crafted from sustainable hardwoods. Each piece is informed by the individual characteristics of the tree from which it was made.

We utilize thick slabs of hardwoods that are kiln dried to a moisture level of 6 to 8 percent. The natural or outer edge of the tree as well as other unique characteristics including burls, knotholes and naturally occurring checks are emphasized in our designs. Each piece is one-of-a-kind.

Each design is handcrafted using mortise and tenon joinery as well as the occasional use of butterfly joints along some checks.

The products are finished with a three coat sealing process, enhancing the natural beauty of each piece.

Polyurethane sealer contains no VOC's.

## CARE & MAINTENANCE

Maintenance consists of the occasional application of a paste wax containing carnauba.

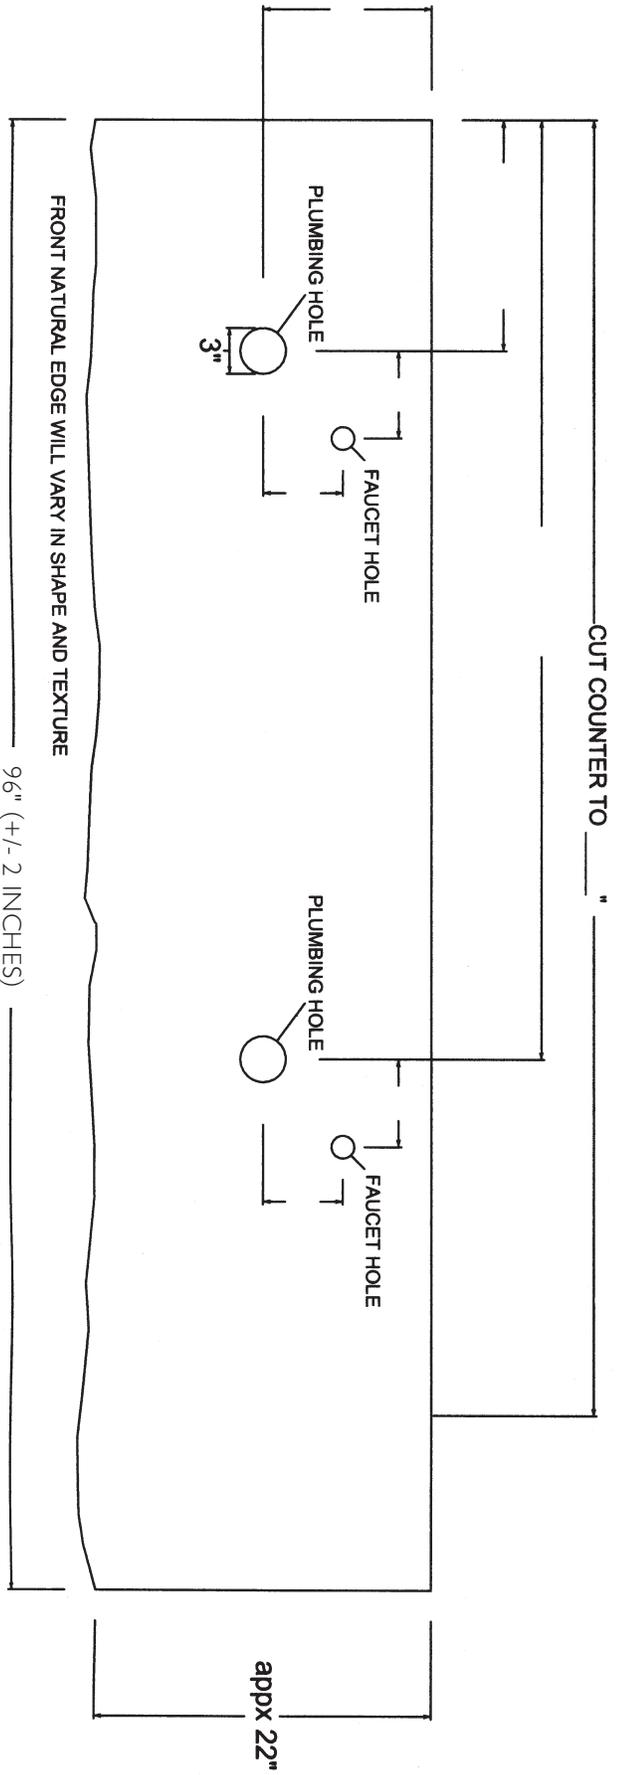

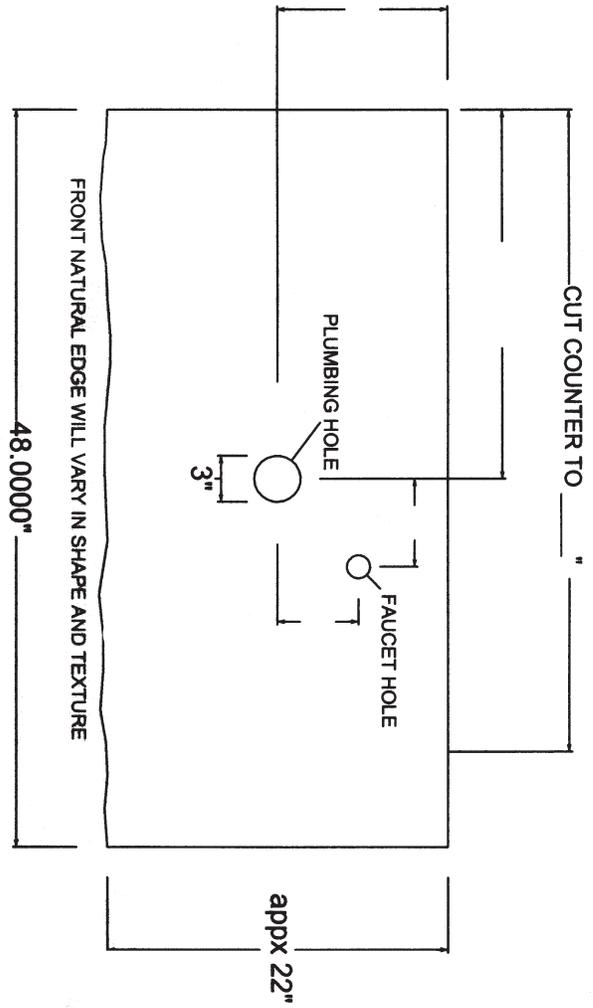

Please note that wood breathes, expands and contracts. Each piece of furniture responds differently to changes in temperature and humidity in your home. Expansion at the joints and seams is to be expected as the seasons change and some minor checking may also result. Small checks may be touched up with a dark colored paste wax.

Our natural edge hardwood furniture is generally shipped fully assembled, but can also be shipped knock down on request to accommodate tight move-ins.

**NOTE: Please inspect all parts carefully prior to installation.**

## PW01 MADERA PEDESTAL, PW15 WOOD STAND, PW11 WASHBASIN STAND

Each piece is stained and then sealed with a water-based sealer. To clean use a soft cloth to wipe
