

2000 SERIES

Hypoid Saw on a Spinning Insert

Sealed Steel Roller Bearings

Dual Rip Gauges

Stop Bar

Product Description:

Designed for customers that are cutting 50 or more sheets a week, the 2000 Series panel saws include our standard features plus an accessory package we would recommend to most production companies. This series unit is ideal for customers that need to break down a large volume of sheet goods that are less than 1¾ inch thick with precision cuts.

Standard features for our 2000 series vertical panel saws include a heavy duty Makita Hypoid Drive saw on a spinning saw insert that is best suited for long hours of operation, in addition to the best dust collection hook ups possible. The folding stand, easy to open & close, provides complete stability while in operation. For portability and mobility, transport wheels are included. This frame size provides an unlimited rip cut capability.

Available Fullsize Models:

52" Cross Cut Model# 2052

MSRP: \$3449

64" Cross Cut Model# 2064

MSRP: \$3649
