

Neutralizer Blend™

Strong pH Adjustment

Protects against acid water, corrosion and iron staining.

Pro Neutralizer Blend is a unique blend of highly alkaline compounds designed to neutralize extreme acid water. This unique blend is formulated to eliminate corrosion of piping, pressure tanks, water heaters and fixtures. Neutralizer is designed for use in acid neutralizer units and should be applied before a water softener. Available in a 50 lb. size.

Applications

First Application: Fill media filter with Neutralizer Blend. Inspect periodically and add Neutralizer Blend to bring the bed back up to its original depth.

Preventative Maintenance: Backwashing of the bed will eliminate the finest of dissolved particles, thus preventing considerable pressure loss.

General Purpose: Neutralizer Blend acts as a filter bed for turbidity, a catalyst for iron reduction, and a neutralizer for low-pH water.

Benefits to the User	Technical Information	Part #	Size	Qty.
<ul style="list-style-type: none"> Restores neutral pH of acid water Prevents corrosion and leaching of metal plumbing Maintains maximum performance of water system and appliances Lowers ppm of iron 	<ul style="list-style-type: none"> Pro Neutralizer Blend is a near white mix of Calcium Carbonate and Magnesium Oxide. Conditions for operation include a pH of 5-6. A backwash rate of 8-12 gallons per minute per square foot with a bed depth of 24 - 30 inches. The service flow rate should be 3-6 gallons per minute per square foot. Store in a cool, dry area, away from heat. Special handling generally not required. Read relevant MSDS before handling product. 	NB50N	50 lb.	1
