

# Compressed Air—Are you being charged too much year on year?

Did your current provider increase their charges to you this year? Chances are you won't have noticed—and chances are if you remain with the same provider, it'll cost you more every year.

## Excellent service doesn't have to come at a price.

All our service contracts will be carried out using recommended service parts, and all services are carried out to manufacturers' recommendations.

## IS YOUR SYSTEM ENERGY EFFICIENT?

If your system is over 5 years old, and your compressor is 22kW or over, we will carry out a free energy audit within the first year of your service contract with us.

## A SERVICE TAILORED TO YOU

**AirCare:** A value-for-money service plan. Includes parts, labour & mileage for a preventative maintenance service. Compressors serviced every 2,000 hrs or annually. Filters & ancillaries serviced 12 monthly. At an additional cost we can carry out repairs with our 24/7 callout service.

**Aircare+** (requires a site survey). As above, but includes our 24/7 emergency call out (time and mileage, repair parts charged separately). After the first year this is essentially an extended warranty for your compressed air equipment. A complete care package.

**AIR COMPRESSORS**

**EDC Air Compressors will beat your annual service contract costs by 15% and guarantee to hold that price for 3 years.**

**Example: Current annual service cost £500.00 + vat**

**EDC Air Compressors cost £425.00 + vat (fixed for 3 years )**

**Your saving = £225.00 (or more if your current provider increases their costs annually)**
