AIR COMPRESSORS

Air compressors for
the food and
beverage industry

Some of our products and services:

* Energy surveys / leak detection

Compressed air is expensive to produce and inefficient systems or leaks could be costing you thousands in energy bills

* VSD controlled compressors

VSD control in your compressor will reduce both maintenance and energy use, providing more control than a softstarter can offer

* Oil-free food grade compressors

See overpage the range of SCR's food grade air compressors

* Desiccant dryers

Perfectly dry air protects your critical components and your process

* Service contracts

24/7 service, support and technical advice only a phone call away

* Pipework design and installation

We can undertake both fabrication and installation

* Parts and service

From lubricants and air filters to hoses and air valves. Ex stock for supply or installation

Why should you choose EDC Air Compressors? Well firstly, you'll be in very good company.

We don't like to name drop, but BMW, Coca Cola, Scottish Water, Astra Zeneca, McLaren GT and a number of distilleries already use SCR air compressors - and EDC Air Compressors is their only official Scottish distributor.

ZARA

Distilleries use compressed air for a number of critical operations: fermentation, aeration, packaging, washing, and some of these applications require guaranteed pure, oil-free air. This is where SCR's XA fixed speed range of class 0 oil-free scroll compressors, and the GV class 0, oil-free variable speed drive range of air compressors can assist. Guaranteeing 100% oil-free air they are the perfect partner for the food and beverage industry, with the XA range able to go down as low as 4kW and the G series starting at 75kW, we have a compressor for every application.

Leasing options are available on all air compressors, call 0141 812 3222
