AIR COMPRESSORS

SCR oil-free air compressors

Big enough to cope, small enough to care

About Us:

Big enough to cope, small enough to care. EDC Air Compressors is a team of local, dedicated compressed air engineers who are always aware of how important costs are to our customers. Scotland's official SCR distributor, we operate 24/7 with engineers only a phone call away.

What our customers say:

"We had already purchased a new energy-efficient SCR compressor when our demand changed and we required to move to oil-free air. EDC Air Compressors were quick to find a solution - which solved our problem for minimal cost with the addition of an oil purification unit to the existing setup. There was no need to buy a new air compressor."

Scroll air compressors use no oil for lubrication and the scrolls produce the necessary amount of air with minimum energy usage.

3.7kW to 30 kW

8 to 10 bar pressure range

100% oil-free compressed air / ISO class 0 cert

Touch screen HMI controller

Belt driven & ultra quiet

Energy efficient / oversized cooler

Class 0 oil-free air compressors

Food and Beverage, Pharmaceutical, Electronics, Textiles, Aquaculture, Agriculture, Automotive, Aerospace, Fluid Transfer

Whether you're looking to avoid the risk of contamination, reduce your environmental impact, eliminate condensate disposal, cut maintenance bills or bring down energy costs - oil-free air shows you care.

We offer fixed and variable speed screw oil-free air compressors (the GV series) and fixed-speed oil-free scroll compressors (the XA range).
