

How to Use Badge Magic® Name Labels

Thank you for selecting Badge Magic Name Labels, the easiest and most versatile way to identify and protect your belongings. If you lose an item, chances are good that the person who finds it would like to return it to you! But they can't, unless they know how to contact you. Be Prepared! Give them the opportunity to return your item by using Badge Magic Name Labels!

You can create a label with any contact information you like, putting only what you want on each individual label. You can write in things like first and/or last names, address, phone number, and whatever other information is appropriate for each type of belonging.

These labels are made with Badge Magic "peel and stick" adhesive so they are waterproof and very strong. They stick to most materials, including fabrics and leather, and can be removed without a trace if needed. They are softer and more comfortable to wear than vinyl labels. The special Badge Magic marker by Sharpie has an ultra-fine tip and the most fade resistant ink available.

On Clothing

If the garment you are labeling is new, wash it before putting on the name label. Write your information on the label while it is still on the label sheet. Place the garment on a flat surface and smooth out the area where you will put the label. Then remove the label from the sheet and press it lightly onto the garment. You can still move the label if you need to. When it is in the desired spot press it down very hard, especially around the edges. Then press on the backside and edges of the label using something hard like a wooden spoon or scissor handle. The label will now be like part of the garment and will not come off unless you want it to! **Do not iron the labels onto clothing!** Ironing will melt the adhesive into the fabric which weakens the adhesive bond and makes removal more difficult later.

On Other Materials

Simply write your identifier on the label, then peel and stick, pressing firmly. With a quick trim, even small items, like your Bluetooth headset or sunglasses can be labeled.

Removal

Apply an adhesive solvent like Goo Gone or Goof Off. For clothing, squirt solvent behind the label. After 2-3 minutes, slowly peel it off. Any residue can be removed by applying more solvent to the label area and soaking it up with a paper towel. Labels can also be removed from clothing by dry cleaning with the traditional PERC solvent method. Visit WWW.BadgeMagic.com for detailed instructions and videos. For other items squirt the solvent on, wait 2-3 minutes, peel off the label, and clean up with solvent.

Which of your CHILDS items should you label?

Backpacks	Electronics	Sports Equipment
Boots and Shoes	Hats and Gloves	Toys
Clothing	Medical Items	Video Games
Coats	School supplies	Water bottles

Which of YOUR valuables should you label?

Athletic Gear	Food Containers	Luggage
