

D Emulse 2000

Pleasant tasting, naturally emulsified liquid vitamin D

D Emulse 2000 is a concentrated, liquid form of vitamin D. A cutting-edge, natural emulsion technology allows for 2000 IU per drop and provides enhanced bioavailability, using only naturally derived ingredients that are free of preservatives and synthetic substances.

Our convenient, pleasant-tasting formula mixes quickly and completely in liquid. It can be dropped into any beverage or simply placed on the tongue, providing accurate dosing one drop at a time. D Emulse 2000 is the ideal vitamin D supplementation for children, the elderly, and anyone who has difficulty swallowing pills.

Benefits of Vitamin D

Throughout our lifecycle, vitamin D assists with proper bone health, as it regulates our body's calcium levels. When calcium levels are low, vitamin D stimulates calcium absorption and reduces calcium excretion, thereby encouraging the maintenance of healthy bones and teeth. During childhood vitamin D assists with normal, healthy bone growth and during adulthood vitamin D assists with maintaining bone density.

In addition, vitamin D aids the immune system by helping to support the body's natural response to fight off illness. Healthy prostate, colon and breast tissue are also supported by vitamin D.

Diet, aging, and lack of sun exposure can all be a cause of vitamin D deficiency

Our bodies can naturally produce vitamin D when unprotected skin is exposed to the sun. Unfortunately, this process may not be as easy as it sounds. As we get older, the ability to create vitamin D from sunlight can become increasingly difficult, and unprotected, exposed skin can be a factor for other health concerns as well. However, using sunscreens to protect the skin from sun damage blocks the natural ability of the skin to create vitamin D. Living in northern latitudes, especially during the winter months, can prevent our bodies from creating adequate amounts of vitamin D. Vegetarians may also find it difficult to reach proper vitamin D levels, because meat is this vitamin's only natural food source.

Recommended Use:

As a dietary supplement, take one drop per day, or as directed by your health care practitioner.
