# Product Parameters

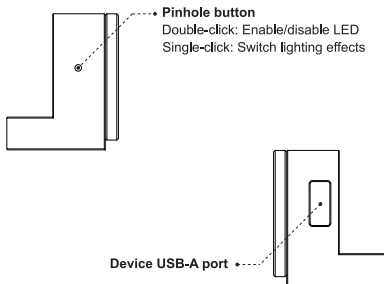

- **Product Name:** DK-HUB USB Hub
- **Model:** DH-01
- **PC Port:** USB-C × 1
- **PC Port Protocol:** UFP USB3.2 Gen2
- **Device Ports:** USB-C × 3, USB-A × 1
- **Device Port Protocol:** DFP USB3.2 Gen2
- **Max Data Rate:** 10 Gbps
- **Power Interface Port:** DC 5V USB-C × 1
- **Power Requirement:** DC 5V
- **Product Dimension:** 150 × 41 × 34(mm)
- **Weight:** 196g
- **Main Materials of the Fuselage:** Aluminium alloy
- **Heat Dissipation:** Aluminium case
- **Lighting effects:** LED dazzling light effects
- **Button:** × 1
- **Usage Method:** Plug and play
- **Supported OS:** Windows / macOS / Linux / iOS / Android

# Contents

- (1) DK-HUB USB Hub × 1
- (2) USB-C 3.2 Gen2 data cable × 1
- (3) USB-C power supply cable × 1
- (4) User manual × 1

# Quick Guide

## Note

- (1) The actual data rate depends on your device and SSD.
- (2) Keep away from high temperatures or humid environments.
- (3) Operating Temperature: 0 ~ 60℃
- (4) Please try to avoid severe shock during use.
- (5) Please keep away from heat sources during use.
- (6) If long term non use, please put this product in the packaging box and store it in a suitable place.
- (7) Please use original accessories to avoid affecting performance.

## Customer Service

The following services are available according to this policy :  
(Returns/Exchanges/Repairs must be processed with a receipt)

- **Warranty Period:** Within 1 year from the day after receiving the product.
- **Return:** Within 7 days from the day after receiving the product, you may return the product due to quality issues.
- **Exchange:** Within 15 days from the day after receiving the product, you may exchange the product due to quality issues.
- **Repair:** Within 1 year from the day after receiving the product, you may have the product repaired due to quality issues.

# Exclusions from Warranty

- (1) Warranty period expired.
- (2) Damages caused by force majeure factors.
- (3) Unauthorized disassembly, repair, modification, or use of non original parts.
- (4) Misuse, negligence, abuse, liquid ingress, collision, or damages caused by accidents
- (5) Improper use/storage environment, such as extreme temperature, high humidity, chemical corrosion, dust pollution.
- (6) Normal wear and natural aging of products.
- (7) Intentional damage caused by human error.
- (8) Malfunctions or damages caused by non product quality reasons.

# Declaration of Toxic and Hazardous Substances in Electronic Products

| Component          | Toxic and Hazardous Substances/Elements |              |              |                              |                                |                                       |
|--------------------|---|--------------|--------------|------------------------------|--------------------------------|---------------------------------------|
|                    | Lead (Pb)                               | Mercury (Hg) | Cadmium (Cd) | Hexavalent chromium (Cr(VI)) | Polybrominated biphenyls (PBB) | Polybrominated diphenyl ethers (PBDE) |
| PCB                | ○                                       | ○            | ○            | ○                            | ○                              | ○                                     |
| Metal components   | ○                                       | ○            | ○            | ○                            | ○                              | ○                                     |
| Plastic components | ○                                       | ○            | ○            | ○                            | ○                              | ○                                     |
| Accessories        | ○                                       | ○            | ○            | ○                            | ○                              | ○                                     |

This table is prepared according to the provisions of SJ/T 11364.

- : Indicates that the content of the toxic/hazardous substance in all homogeneous materials of the component is below the limit specified by GB/T 26572.
- ×: Indicates that the content of the toxic/hazardous substance exceeds the limit specified by GB/T 26572 in at least one homogeneous materials of the component.

The information in this table is based on supplier data and testing results that comply with RoHS environmental requirements.
