Linx Vapor Set To Release Smallest Concentrate Vaporizer Under \$40

Los Angeles , CA 5/31/2018 – California Based VGO LLC (Linx Vapor) is set to release a new low-cost concentrate vaporizer for the masses and the device is already receiving raving reviews ahead of its launch. **The new device, the Linx Ember, promises to be the highest quality vaporizer in the \$40.00 range and is slated for released May 31st, 2018.**

The Ember is constructed from Medical Grade Stainless Steel and has 3 heat settings and a 12 second sesh mode, making optimal use of its spill proof, top airflow design. The device is also ultra-small and very portable, measuring in at just 10.5mm by 110.3mm, a must for anyone looking to get the most out of their vaporizer on the go while not at the expense of discretion. The device uses a quartz rod atomizer wrapped with a titanium coil. The base of the atomizer is ceramic and funnel shaped, directly connecting the concentrate to the heating element. One of the more innovative components on the Linx Ember that puts the product in a league of its own is the innovative vapor window which allows users to see the entire vaping process. The vapor swirling off the atomizer is almost mesmerizing as it billows up through the mouthpiece. (But don't just take our word for it!)

The Linx Ember comes complete with a refillable quartz rod atomizer, battery, mouthpiece, filter, and USB charger. The Linx Ember will be available for purchase beginning May 31st of 2018 with volume

orders to follow later in June 2018. Linx Vapor includes a free one-year limited warranty on every product.

About Linx Vapor

Linx Vapor started making headlines within the vaporizer community back in 2016 with the launch of the Linx Hypnos Zero. The Zero made waves due to its use of a ceramic plate atomizer (an industry first) rather than the standard coiled atomizer. Linx Vapor continued down this path of health consciousness and innovation as they released the Linx Ares, and the Linx Gaia. All three vaporizers received top honors from High Times, the largest Cannabis publication in the industry. The Linx Vapor name has become synonymous with innovation and quality and it seems they're just getting warmed up.

Linx Vapor remains on the forefront of vaporizer innovation, with a mission to continue to advance the Cannabis community's standards while helping to bring a component of health consciousness to an industry that is in many ways still in its infancy stage.

The goal of California based Linx Vapor is to combine maximum innovation with superior style, design and construction to the growing category of vaporizers.
