

CRAFT BEER FOR DOGS

We use real malt extract, combine it with a beef base and canine glucosamine, to give your dog a 'steak-and-beer' tasting treat that is good for their joints.

Ways to use it:

1. Pour over their food to help entice them to eat.
2. Pour in an ice cube tray (maybe even sprinkle some Shake on top) and freeze.
3. Lick right off the spoon!

CRAFT BEER BISCUITS

Ingredients you can count on one paw!

We take the spent grains from over 80+ craft breweries, mix in a little egg, flour, peanut butter, and whole lot of love to make our homemade dog biscuits.

- High Protein
- High Fiber
- Low Fat
