

# Dip Powder System

---

Dip Powder is an alternative soak-off system to gel and acrylic that provides 2+ weeks of superior strength and chip-free colour. Dip promotes natural nail growth and can be applied onto natural nails or over artificial tip extensions.

As an air-dry product, Dip Powder does not require the use of any LED/UV lamps.

Available in 124+ colours, the Dip Powder shades are inspired by the 3STEP Colour Gel Polishes and BeBio Nail Lacquers. The 2-in-1 formula can be used to create traditional acrylic nails with your choice of liquid monomer.

# DIP POWDER SYSTEM OVERLAY INSTRUCTIONS

Achieve superior strength for your natural nails with our Dip Powder without the use of LED/UV lamps.

## 1. PREP NAILS

Lightly buff nails and cleanse with 70%+ alcohol to remove oils and dusts.

## 2. DIP LIQUID #1 PREP

Apply one coat of #1 Prep to all fingernails and allow 60 seconds air-dry time.

## 3. DIP LIQUID #2 BASE & DIP POWDER #0 NATURAL

*Applying on one fingernail at a time:*

Apply one thin coat of #2 Base on only 75% of the nail, leaving space at the cuticle.

Immediately dip into #0 Natural in a 45° angle and tap off excess powder.

Repeat with the rest of the fingernails.

Allow 60 seconds air-dry time.

## 4. DIP POWDER COLOUR FIRST COAT

*Applying on one fingernail at a time:*

Roll and shake jars well before use.

Apply one thin coat of #2 Base to 100% of the nail.

Immediately dip into desired Dip Powder Colour in a 45° angle and tap off excess powder.

Repeat with the rest of the fingernails.

Allow 60 seconds air-dry time.

## 5. DIP POWDER COLOUR SECOND COAT

Repeat Step 4 until desired opacity is reached per fingernail.

Allow 60 seconds air-dry time.

## 6. DIP POWDER #00 CLEAR

*Applying on one fingernail at a time:*

Roll and shake jars well before use.

Apply final thin coat of #2 Base to 100% of the nail.

Immediately dip into #00 Clear in a 45° angle and tap off excess powder.

Repeat with the rest of the fingernails.

Allow 60 seconds air-dry time.

## 7. DIP POWDER #3 ACTIVATOR

Apply one coat of #3 Activator to all fingernails.

Allow 60 seconds air-dry time.

## 8. BLEND & SHAPE

File, buff and shape nails as desired.

Apply final layer of #3 Activator to all fingernails.

Allow 60 seconds air-dry time.

## 9. DIP LIQUID #4 TOP

Apply 2 coats of #4 Top immediately back to back.

Allow 5 minutes of air-dry time.

Note: First coat of #4 Top must be wet to properly adhere to second coat of #4 Top. Count 5-10 seconds between applying the first layer and second layer.

## 10. DIP LIQUID #5 BRUSH SAVER (OPTIONAL)

Use #5 Brush Saver to effectively clean, soften and dissolve leftover dip powder on brushes before and after application.
