

# Pearlescent Enamels

Oil based, high gloss enamel for exterior use on metal, glass, wood and enamel receptive vinyl. Intended for sign writing on exterior signs, store fronts, vehicles and wherever fine lettering work is desired.

## Features & Benefits

1-Shot Pearlescent Enamels display brilliant luster under high intensity light and direct sunlight.

## Compatible Surfaces

Metal, glass, wood, MDO and enamel, receptive banner and vinyl material

## Optional Products

**Hardeners:** 4007 Hardener. No more than 10%.

**Reducers:** ZZ6000 Chromaflo Enhancer, ZZ6001 Low Temperature Reducer, ZZ6002 High Temperature Reducer

**Additives:** 4329500 Clear Flattening Paste (no more than 50%), Dana Color D406 Smith's Cream Blending Agent (no more than 10%)

## Directions For Use

### Surface Preparation:

- Apply over clean, dry surfaces which are free from wax, grease, dust, chalk, etc., and have been primed with the appropriate 1-Shot/Chromatic Primer.
- Prime most rigid plastics, (including polystyrene, PVCs and PVFs) with Chromatic 5004 Clear Vinyl Primer. Prime most flexible plastics, synthetics, (including vinyl, many awning materials and non-ERC prepared banner materials) as well as leather and faux leathers with Chromatic Ti-Cote Primer Barrier (4331010 Gloss/4331011 Flat)

## Directions For Use (Continued)

---

### Application:

- Brush, roll, spray or airbrush.
- For brush applications, use only as much reducer as needed to maintain desired flow characteristics and brush control.
- For spray applications, use no more than 40% 1-Shot ZZ6001 Low Temp Reducer.
- Do not reduce 1-Shot Pearlescent Enamels for roller applications.
- 1-Shot Pearlescent Enamels are translucent in nature, and should therefore be applied over a base of a similar color, white of may require double coating.
- Spray applications will eliminate brush strokes and uneven coverage.

### Drying Times:

Vary by color, application method, temperature, humidity, and film thickness.

- Dry to touch: 2 to 5 hours
- Dry to handle: 8 to 12 hours
- Dry to recoat: 12 to 16 hours

### Equipment:

Brush, roll, spray or airbrush

### Equipment Cleaning:

- Clean equipment with mineral spirits
- Clean brushes with 1-Shot 4004 Brush Cleaner

### Technical Data:

VOC.....3.2-3.34 lbs/gallon
