10	5/16" Lock Washer			

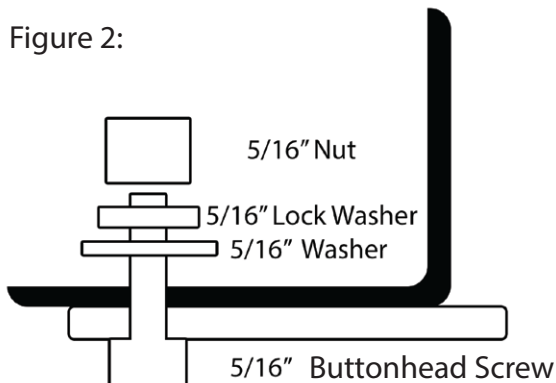

## INSTALLATION INSTRUCTIONS

Figure 1

- 1) Securely lift the vehicle to gain access to the bottom of the side skirts.
- 2) Remove the plastic clips on the bottom of the side skirts so the side skirts can be pulled down.
- 3) Line up the rear edge of the splitter to the end of the side skirt. The side splitter should extend 1" from the side of the side skirt.
- 4) Drill the rear most 3/8" hole and attach the supplied hardware. The hardware should be attached as shown in Figure 2.
- 5) Align the splitter straight and drill the next 3/8" hole and attach the supplied hardware. Make sure the side splitter is flat against the skirt before drilling.

Figure 2:

- 6) Drill and install the remaining hardware so the side splitter is firm on the skirt.
- 7) Reinstall plastic clips on side skirt.

Optional:  
Remove side skirts for easier installation.
