# INSTALLATION INSTRUCTIONS

Remove the plastic rivets from the driverside splash guard to access the foglight area (keep for later). Repeat on the passenger side.

**1**

Unplug and remove the OEM foglight. Repeat on passenger side.
Note: Foglight is attached by (1) M6 bolt; use 10mm socket to remove.

**2**

**FRONT →**

Attach new foglight to Light Conversion Bracket like shown above. Repeat on passenger side.

**3**

Add (1) 1/4" SAE Flat Washer to factory M6 bolt, like shown above.

**4**

Install the new foglight assembly onto the bumper using M6 bolt and washer from previous step.

5

**Baja Designs Connector**

**Adapter**

to Baja Designs light

to vehicle connector

**Wiring Adapter (optional)**: Refer to diagram above for orientation of connector pieces when attaching Baja Designs male plug end to Wire Harness Adapter.

(+)

(-)

(+)
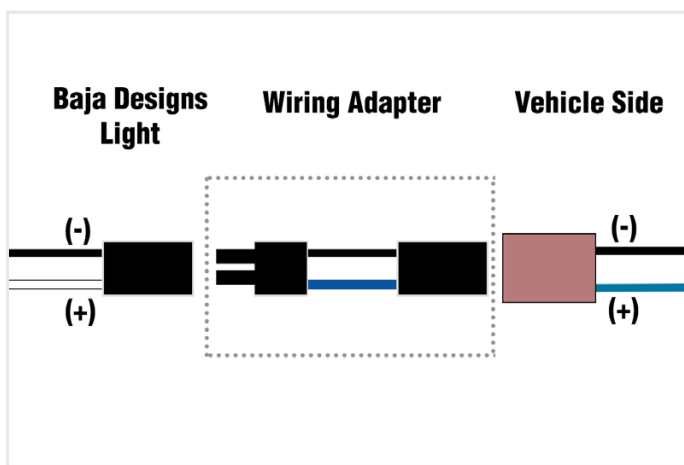

**Wiring Diagram:** Ensure polarity (-/+) on the Baja Designs light matches the polarity on the vehicle side.

Note: Vehicle side wires may be different color, black wire does not always indicate (-) negative polarity so please double check before installing.

7

Repeat all steps on the passenger side.

Completed assembly shown above.
