Make:	Subaru
Model:	2022+ WRX
Applications:	Light Conversion

PACKAGE CONTENTS				TOOLS
QTY		QTY		Flat Head or Phillips Screwdriver
2	Light Conversion Bracket			Socket Wrench
1	Wire Harness Adapter Kit (Optional)			10mm Socket or Wrench
				Wire Stripper
				Wire Crimp

INSTALLATION INSTRUCTIONS

Locate corner splash guard.

1

Remove splash guard. Remove fender plastic rivets to allow access behind the foglights.

2

Unplug the foglight harness and undo the plastic screw and Phillips screw shown above (keep for later). Remove factory foglight from bumper cover.

3

Attach new foglight to Light Conversion Bracket like shown above. Repeat on passenger side.

4

Attach new foglight assemblies to the bumper cover using the factory hardware (plastic screws and M6 bolts). Tighten screws and bolts. Torque M6 bolt to 11 ft-lbs.

5

BAJA-BLACK → ADAPT-BLUE

BAJA-WHITE → ADAPT-BLACK

Assembling Wire Adapter (Optional):   Note that the provided dual-application adapter requires to reverse the color polarity on this car. Test polarity before assembling wires to the Baja Designs connector. Note that the adapter connects to OEM connecter easier on one orientation than the other.

6

Note: Follow the instructions provided by Baja Designs to wire an independent switch.

Troubleshooting : If the light does not come on check the following:
- The connections are not firmly locked. Firmly connect the ends.
- The connection from the adapter to the OEM plug may not be in correct orientation. Rotate the connecter.
- The wire polarity on the adapter could be reversed. Disassemble adapter on the Baja Design-Adapter end, and switch the wires.

7

Reinstall fender cover, splash guard, and front bumper cover (if removed) using factory plastic clips.
