2	Light Conversion Bracket			1/4" SOCKET/WRENCH
2	Light Conversion Adapter Pigtail (optional)			FLATHEAD SCREWDRIVER
				PANEL REMOVAL TOOL
				WIRE CRIMPS

INSTALLATION INSTRUCTIONS

Remove the necessary clips from the foglight splash guard, which is located in front of each front wheel and below the front bumper. This will allow access to the foglight area.

1

Pull down the foglight splash guard to gain access to the foglight area.

2

Plastic screw

10mm flangehead bolt

Remove the plastic screw clip with a flathead screwdriver. Then, remove the 10mm flangehead bolt with a 10mm socket. This will free up the foglight and it should slip out. Don't forget to unplug the light from its harness.

3

Here is what you should have removed in the previous step. Retain the hardware for install of the new light assembly.

4

Assemble Baja Designs light and light conversion bracket using the included small screws in the Baja Designs light package. Mount the light to the top holes on the bracket like shown in the picture.
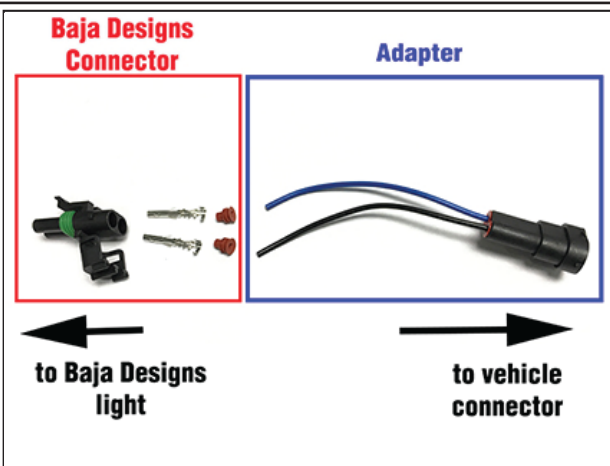

5

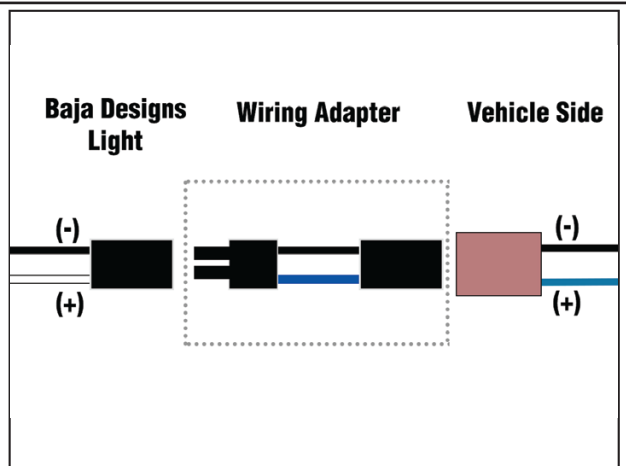

Here is the foglight ready to install in the vehicle.

Note: the face of the foglight should be parallel with the face of the mounting bracket.

6

Wiring adapter (optional) - Orientation
Connect the included Baja Designs connector to the wiring adapter pigtail in the orientation shown above.

7

Wiring adapter (optional) - Wiring Diagram
The black wire coming from the light connects to the ground wire (-) on the vehicle harness. You may need to verify which wire is ground on the vehicle side (using a multimeter) as the wire color may not always be black.

8

Install the new light assembly into the vehicle in the reverse order of removing the factory foglight. Reuse the factory hardware. Plug in the wiring adapter harness (if you have it) into the light and then into the vehicle harness. Fasten the harness to a secure location.

9

Repeat previous steps on the opposite foglight assembly. Once complete check to see that both lights turn on and then return the foglight splash guards and clips to their place.

Install complete.
