1	Fog Light Adapter Kit (optional)			5/32" Hex Key
6	1/4"-20 x 3/4" Carriage Bolt			
6	1/4" Flat Washer			
6	1/4"-20 Kep Nut			

INSTALLATION INSTRUCTIONS

Remove fog light splash guard by unfastening the plastic clips securing it to the front bumper.

1

Remove factory fog light by undoing the (3) fasteners on the backside of the light (behind front bumper). One of the fasteners is a plastic clip that can be removed using a panel removal tool, while the two others are removed using a philips screwdriver. Retain hardware for reinstallation later.
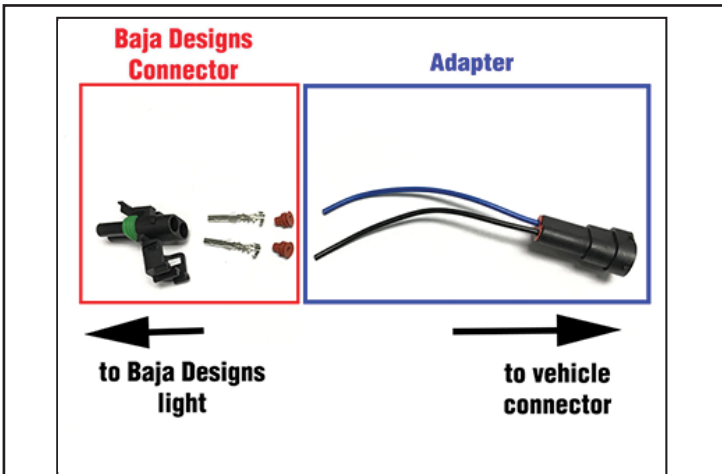

2

Use upper mounting hole for S2 lights

Install new fog light into mounting bracket. Use the top mounting hole for this application.

3

Install light assembly into the fog light area from behind the front bumper. Fasten the assembly to the front bumper using the original hardware removed in step 2.
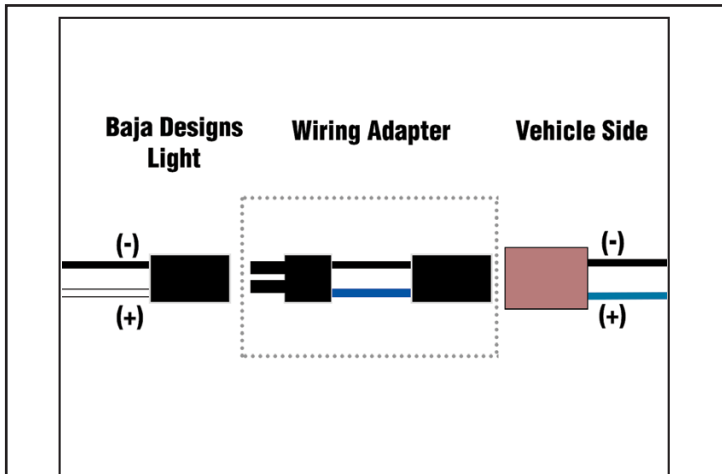

4

Wiring adapter (optional) - Orientation
Connect the included Baja Designs connector to the wiring adapter pigtail in the orientation shown above.

5

Wiring adapter (optional) - Wiring Diagram
The black wire coming from the light connects to the ground wire (-) on the vehicle harness. You may need to verify which wire is ground on the vehicle side (using a multimeter) as the wire color may not always be black.

6

Reinstall the fog light splash guard and repeat all steps for the installation of the passenger side fog light.

7

Completed assembly shown.
