

**STEP 1 – CLEANSE****OIL CLEANSER**

Remove impurities from oily, troubled, irritated skin and see a visible reduction in pores. The oil cleansing method is the only way to get your pores unclogged, easy peasy!

**DIRECTIONS**

Use daily for acne or clogged skin until skin is cleared of impurities. For oily to normal skins.

Use a small pea sized amount and massage into face for a minute or two. Use a face cloth and wet under hot running water, (not too hot to scald). Wring out, hold over face to steam for 20 seconds, repeat 2 or 3 times, then wipe off with the cloth. No need for cleansing. This is an intense cleanse, and impurities will easily come out of the skin. If skin feels too dry, it may just be re-adjusting, so you can apply a drop of oil to dry skin.
