114 West 26th Street
New York, NY 10001
Tele.212-645-9033

Included in with the bed rails:

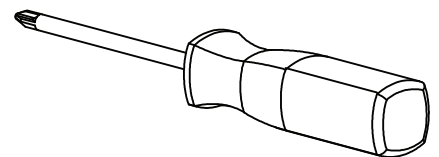

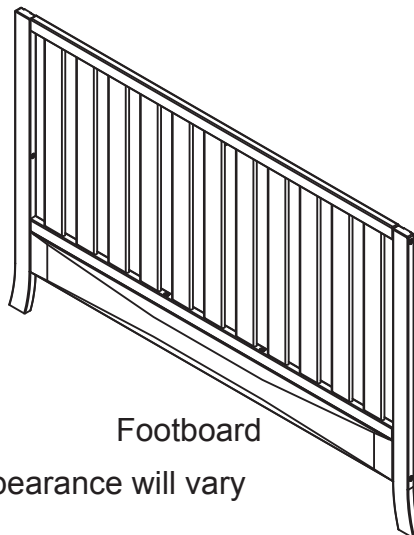

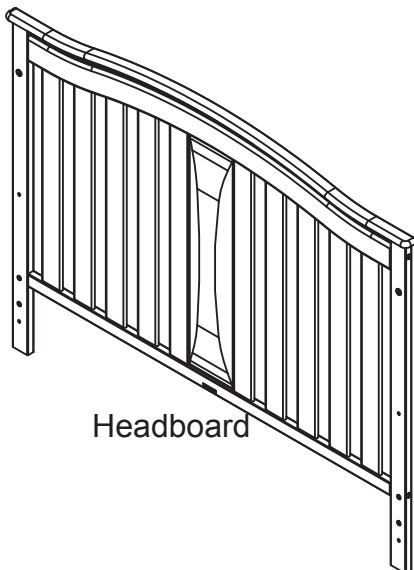

D. x8

H x8

You will also need:

* Headboard and Footboard appearance will vary by crib style.
See crib instructions to assembled headboard and footboard.

**Phillips Screwdriver
or Adjustable Wrench
Required**

To attach the Bedrails to your Headboard and Footboard

1. Select the correct bolts

- a. See crib instructions, most cribs are supplied with the correct (8) bolts
- b. The bed rails include (8) Standard Bolts and (8) Metric Bolts, if you no longer have the bolts supplied with your crib, use those supplied with the bed rails.
 - i. To determine which bolts to use, remove one of each from the package and with **ONLY** your fingers attempt to install the bolt in the crib post, if it does not thread in easily try the other bolt (be sure to try both bolts).
 - ii. Sort the bolts and set aside the ones that do not thread easily and **DO NOT** use them.

2. Attach the Bedrails to the headboard and footboard using (2) Bolts at each location. **DO NOT** completely tighten at this time.

3. Test fit the foundation (a mattress foundation must be used with these bed rails), make any adjustments and then tighten all bolts with a screwdriver or adjustable wrench.
