*Never use plastic shipping bags or other plastic film as mattress covers because they can cause suffocation.
*Infants can suffocate in gaps between crib sides and a mattress that is too small. Use a crib mattress that is no thicker than 15 cm and is of such a size that, when it is pushed firmly against any side of the crib, it does not leave a gap of more than 3 cm between the mattress and any part of the sides of the crib.
*Ensure a safe environment for the child by checking regularly, before placing the child in the crib, that every component is properly and securely in place.
*To avoid head injury, do not allow any child to play underneath the crib.
*Never add an accessory such as a bassinet or changing table that extends over the sleeping area.
